A 'HOW-TO' GUIDE FOR NEGLECTED
TROPICAL DISEASE PROGRAMMES

I. **What can this toolkit help you achieve?**

The equity focus set out by the 2030 Agenda for Sustainable Development demands new ways to deliberately extend services to unserved populations. Successful water, sanitation and hygiene (WASH) and neglected tropical disease (NTD) partnerships have the potential to help achieve this ambition. But working together in new ways requires new ways of thinking.

I. What can this toolkit help you achieve?

This toolkit will help you – whether you are a NTD programme manager or programme partner – to work with the WASH community, guiding you through building those partnerships, mobilising resources, and designing, implementing and evaluating interventions. Rather than a ‘best practice’ guide, it’s a set of tools based on real-life programme experience; you can choose and adapt tools according to your needs and local context. The toolkit will help you:

- Build multisectoral partnerships with key stakeholders: ministries, national and local WASH agencies, corporates, local health groups, behaviour change and communication experts, etc.
- Shape smart programme structures focused on accountability and shared goals.
- Build an adaptive and flexible approach to programming.
- Ensure sustainability by building local capacity at every level.
- Support and complement clinical and public health interventions for NTD control.
