ACKNOWLEDGEMENTS

This guidance for after action review (AAR) document and the accompanying toolkits are the result of a common vision of the importance of collective learning following a public health event. That vision, and the close collaboration that led to the creation of these resources, are shared between WHO regional offices, WHO headquarters, WHO Member States and partners.

This document was developed by the team in charge of after action reviews in the Core Capacity Assessment, Monitoring and Evaluation (CME) Unit under the Country Preparedness and International Health Regulations (CPI) Department of the WHO Health Emergencies Programme at WHO headquarters: Mr Denis Charles; Mr David Cuenca; Mr Nicolas Isla; Dr Landry Ndriko Mayigane (AAR focal point); Dr Yingxin Pei; Ms Candice Vente; Ms Anna Young; and Mr Jerome Stephane Frederic Zanga Foe, under the leadership of Dr Stella Chungong.

During the course of this work, they received valuable contributions from colleagues at WHO headquarters: Mr Jonathan Abrahams; Dr Anne Ancia, Dr Guillaume Belot; Dr Jorge Echenique Castilla, Mr Frederik Copper; Dr Stéphane De La Rocque De Severac; Dr Qudsia Huda; Dr Nirmal Kandel; Ms Adrienne Rashford; and Dr Rajesh Sreedharan.

Special thanks go to colleagues at WHO regional offices for their technical contributions and for the initial work on AAR done in the WHO regions – especially in the European and African regions – that has been the basis of the globally applicable materials presented here: Dr Yahaya Ali Ahmed; Dr Roberta Andraghetti; Dr Freddy Banza-Mutoka; Dr Nilesh Buddh; Dr Amadou Bailo Diallo; Dr Gyanendra Gongal; Dr Thomas Dieter Hofmann; Dr Masaya Kato; Dr Heather Eve Papowitz; Dr Dalia Samhouri; Ms Tanja Schmidt; and Dr Mary Stephen.

Thanks also go to Dr Richard Garfield of the United States Centers for Disease Control and Prevention; Dr Christopher Lee of Resolve to Save Lives; Dr Christopher Perdue of the United States Department of Health and Human Services; and Dr Michael Stoto of Georgetown University and the Harvard T.H. Chan School of Public Health for their technical inputs.

Special thanks also go to the members of the Country Preparedness Support Team of the European Centre for Disease Prevention and Control for their contribution to this document.

WHO would like to acknowledge the United Kingdom Department for International Development, the Government of Germany, and the United States Department of Health and Human Services for providing financial support for this work.
