Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

# Contents

Foreword .....	v
List of abbreviations.....	vii
Executive summary.....	ix
<b>1. Public health laboratories and communicable diseases</b>	
1.1 Laboratories and communicable diseases.....	1
1.2 Need for efficient public health laboratories.....	2
1.3 Role of public health laboratories in combating communicable diseases.....	3
1.4 Impact of public health laboratories on communicable diseases .....	4
1.5 Access to quality public health laboratories is a challenge ...	5
1.6 Issues to be addressed by public health laboratories .....	5
1.7 Linkages with other laboratories in related sectors .....	6
1.8 Overview of a public health laboratory framework .....	6
<b>2. Essential functions of public health laboratories</b>	
2.1 Core functions of public health laboratories .....	10
2.1.1 Supporting policy formulation and programme development .....	10
2.1.2 Providing technical services.....	11
2.1.3 Undertaking environmental analyses .....	11
2.1.4 Developing human resources.....	12
2.1.5 Strengthening quality systems.....	12
2.1.6 Biosafety and biosecurity .....	12
2.1.7 Supporting regulatory functions .....	13
2.1.8 Undertaking, promoting and coordinating research ...	13
2.1.9 Functioning as a repository of standard and characterized strains.....	13
2.1.10 Managing essential procurement and logistics .....	14
2.1.11 Managing laboratory data.....	14
2.1.12 Coordinating the network of laboratories.....	14
2.1.13 Providing an interface with national and international partners and agencies .....	14
2.1.14 Communicating with the public and with partners.....	15
2.2 Functions of public health laboratories at different levels .....	15

<b>3. Current status of public health laboratories in the WHO South-East Asia Region</b>	
The situation.....	19
3.1 National laboratory policy and strategic plan .....	19
3.2 Organization, structure, function and human resource .....	20
3.3 Detection and characterization of pathogens and the referral mechanism .....	21
3.4 Quality management system and accreditation .....	22
3.5 Laboratory biosafety .....	23
3.6 Inter-sectoral collaboration.....	24
3.7 Challenges .....	24
3.8 The way forward .....	25
<b>4. Challenges in establishing public health laboratories</b>	
4.1 Policy and programmatic issues.....	29
4.1.1 Resource allocation .....	29
4.1.2 National laboratory policy and a strategic and operation plan.....	30
4.1.3 Laboratory networking .....	30
4.1.4 National focal point and national laboratory coordinating committee .....	30
4.2 Technical challenges .....	31
4.2.1 Laboratory facilities .....	31
4.2.2 Procurement and supply chain management.....	31
4.2.3 Regulation of diagnostics.....	31
4.2.4 Research.....	32
4.2.5 Quality assurance and accreditation.....	32
4.2.6 Biosafety and biosecurity .....	32
4.3 Financial resources.....	32
4.4 Human resource .....	33
4.5 Sustainability of public health laboratory services .....	33
<b>5. Establishing a national public health laboratory system</b>	
5.1 Leadership/governance and organization.....	39
5.1.1 National laboratory focal point .....	40
5.1.2 National laboratory coordinating committee .....	40
5.1.3 National laboratory policy and strategic plan .....	41
5.2 Country situational analysis .....	41
5.3 National laboratory policy .....	41
5.4 National laboratory strategic plan.....	41
5.5 Financial support .....	42
5.6 Regulatory framework .....	42
5.7 Public health laboratory network system .....	42
5.8 Laboratory human resource development .....	43
5.9 Information management and communication system.....	43
5.10 Quality management system .....	44

5.11	Laboratory infrastructure .....	44
5.12	Harmonization in laboratory networking .....	44
5.13	Validating testing algorithms.....	45
5.14	Equipment management.....	45
5.15	Supply chain management .....	46
5.16	Specimen collection, referral and transportation .....	46
5.17	Laboratory safety and waste management .....	46
5.18	Research and development .....	47
<b>6.</b>	<b>Tests to be conducted in public health laboratories</b>	
6.1	Key functions.....	51
6.2	Tests carried out at various levels of public health laboratories..	51
<b>7.</b>	<b>Essential requirements of public health laboratories</b>	
7.1	Laboratory management .....	60
7.2	Physical infrastructure .....	60
7.3	Human resource .....	61
7.4	Equipment .....	62
7.5	Sample collection and storage .....	62
7.6	Quality control and quality assurance requirements.....	63
7.7	Supply chain management .....	64
7.8	Information management.....	65
7.9	Biosafety .....	65
7.10	Transportation of samples.....	66
7.11	Coordination with the national programme and field staff.....	67
<b>8.</b>	<b>Human resource development for public health laboratories</b>	
8.1	Education and capacity development .....	73
8.2	Human resource plan and improvement.....	74
8.3	Certification.....	76
<b>9.</b>	<b>Networking of public health laboratories</b>	
9.1	Goal of networking .....	79
9.2	Types of laboratory networks .....	79
9.3	Functions of a laboratory network .....	80
9.4	Requirements of a laboratory network.....	81
9.5	Prerequisites for establishing a laboratory network.....	81
9.6	Composition of a national public health laboratory network ...	82
9.7	A step-by-step approach to establishing a national laboratory network.....	82
<b>10.</b>	<b>Data management</b>	
10.1	Importance of data management in public health laboratories .....	87
10.2	Methods of data management currently available.....	88
10.3	Information technology .....	88
10.4	Laboratory information management system (LIMS).....	89

10.5 Software available .....	90
10.6 Challenges to data integration .....	90
10.7 Use of data within the laboratory .....	90
10.8 Dissemination of data .....	91
10.9 Annual reports.....	91

## 11. Research priorities for public health laboratories

11.1 Research objectives of public health laboratories .....	95
11.2 Research gaps.....	95
11.3 Research potential of public health laboratories at different levels.....	96
11.4 Priority research areas.....	97
11.4.1 Enhancing the detection of causative agents .....	97
11.4.2 Development of quality diagnostic tools for neglected diseases.....	99
11.4.3 Tools to monitor the environment.....	99
11.4.4 Expanding characterization of pathogens.....	100
11.4.5 Increase the stability of diagnostic reagents.....	100
11.4.6 Development of diagnostics using locally prevalent microorganisms.....	100
11.4.7 Determination of antimicrobial resistance patterns using rapid and real-time tests .....	101
11.4.8 Development of environment-friendly technologies...	101
11.4.9 Animal–human interface.....	101
11.4.10 Detection of pathogens, especially viruses from wildlife.....	102

## 12. Monitoring, evaluation and independent review of the public health laboratory system

12.1 Monitoring and evaluation.....	105
12.1.1 Monitoring the creation of a national public health laboratory leadership framework.....	106
12.1.2 Monitoring essential components of public health laboratories .....	107
12.1.3 Monitoring human resource management .....	108
12.1.4 Monitoring the quality of laboratory services .....	108
