Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

CONTENTS

Acknowledgements	IX
Financial support	IX
Scope and purpose	IX
1. Anaemia as a public health problem	1
1.1 Classification and etiology of anaemia	2
1.1.1 Nutrient deficiencies	2
1.1.2 Disease	2
1.1.3 Genetic haemoglobin disorders	4
1.2 Vulnerable groups	4
1.2.1 Infants and children under 2 years of age	4
1.2.2 Children under 5 years of age	4
1.2.3 Adolescents and women of reproductive age (non-pregnant and pregnant)	4
1.2.4 Older adults	5
1.3 Health consequences of anaemia	5
1.3.1 Maternal and perinatal outcomes	5
1.3.2 Child development	6
1.3.3 Child morbidity, mortality and physical growth	6
1.3.4 Work productivity and physical activity	6
1.3.5 Other morbidity and mortality outcomes	6
1.4 Economic and developmental consequences of anaemia	7
1.5 Assessment of anaemia	7
1.6 Magnitude and distribution of anaemia	10
1.6.1 Women and children	10
1.6.2 Older adults	11
2. Determinants of anaemia	13
2.1 Biological determinants of anaemia	14
2.1.1 Nutrient deficiencies	14
2.1.2 Other forms of malnutrition	17
2.1.3 Growth, physiological state, sex, age and race	18
2.2 Disease (infection and inflammation)	21
2.2.1 Soil-transmitted helminth infections	21

2.2.2	Schistosomiasis	21
2.2.3	Malaria	21
2.2.4	HIV	22
2.2.5	Tuberculosis	22
2.2.6	Low-grade inflammation	22
2.3	Genetic haemoglobin disorders	22
2.4	Social, behavioural and environmental determinants of anaemia	23
2.4.1	Social and behavioural determinants	23
2.4.2	Environmental factors	24
3.	Solutions to anaemia	27
3.1	Nutrition-specific solutions to anaemia	28
3.1.1	Food-based strategies	28
	Key actions and recommendations: dietary diversification and enhancing the bioavailability of micronutrients	30
	Key actions and recommendations: breastfeeding	31
	Key actions and recommendations: complementary feeding	32
	Key actions and recommendations: mass fortification	34
	Key actions and recommendations: targeted fortification	35
	Key actions and recommendations: point-of-use fortification	36
	Key actions and recommendations: biofortification	38
3.1.2	Micronutrient supplementation: iron and folic acid	38
	Key actions and recommendations: iron and folic acid supplementation	39
3.1.3	Social and behaviour-change communication strategies	44
	Key actions and recommendations: social and behaviour-change communication	45
3.2	Nutrition-sensitive solutions to anaemia	46
3.2.1	Parasitic infections: malaria, soil-transmitted helminth infections and schistosomiasis	46
	Key actions and recommendations: malaria control	47
	Key actions and recommendations soil-transmitted helminth infections and schistosomiasis control	49
3.2.2	Water, sanitation and hygiene	50
	Key actions and recommendations: water, sanitation and hygiene	51
3.2.3	Reproductive health practices	52
	Key actions and recommendations: reproductive health practices	53
3.2.4	Intersectoral actions	56
	Key actions and recommendations: intersectoral actions	56

4. Development of an anaemia-control strategy	59
4.1 Model for developing anaemia-control strategies	60
4.1.1 Assess and understand the problem: situational analysis	60
4.1.2 Raise awareness and conduct high-level advocacy	61
4.1.3 Create an anaemia task force and develop partnerships	61
4.1.4 Determine programmatic interventions and develop implementation plans	62
4.1.5 Develop a monitoring and evaluation plan	62
4.2 Examples of national anaemia-control plans	62
4.2.1 Bangladesh	62
4.2.2 Panama	63
4.2.3 Thailand	63
5. Monitoring and evaluation of anaemia-control programmes	65
5.1 Key components of a monitoring and evaluation plan for anaemia-control programmes	66
5.1.1 Logic model	66
5.1.2 Performance indicators	68
5.1.3 Data flow and management	70
5.2 Framework for evaluation of anaemia-control programmes	71
1. Engage the stakeholders	71
2. Describe the programme	71
3. Focus the evaluation design	71
4. Gather credible evidence	72
5. Justify the conclusions	72
6. Ensure use of the programme and share lessons learnt	72
