Defining public health surveillance	14
Surveillance: ethics, law and history	16
III. Framing the ethics of surveillance	19
Existing guidelines	19
Public health ethics	20
IV. Guidelines	24
Guideline 1. Countries have an obligation to develop appropriate, feasible, sustainable public health surveillance systems. Surveillance systems should have a clear purpose and a plan for data collection, analysis, use and dissemination based on relevant public health priorities.	25
Guideline 2. Countries have an obligation to develop appropriate, effective mechanisms to ensure ethical surveillance.	27
Guideline 3. Surveillance data should be collected only for a legitimate public health purpose.....	29
Guideline 4. Countries have an obligation to ensure that the data collected are of sufficient quality, including being timely, reliable and valid, to achieve public health goals.	30
Guideline 5. Planning for public health surveillance should be guided by transparent governmental priority-setting.	31
Guideline 6. The global community has an obligation to support countries that lack adequate resources to undertake surveillance.	32

Guideline 7. The values and concerns of communities should be taken into account in planning, implementing and using data from surveillance.	33
Guideline 8. Those responsible for surveillance should identify, evaluate, minimize and disclose risks for harm before surveillance is conducted. Monitoring for harm should be continuous, and, when any is identified, appropriate action should be taken to mitigate it.	34
Guideline 9. Surveillance of individuals or groups who are particularly susceptible to disease, harm or injustice is critical and demands careful scrutiny to avoid the imposition of unnecessary additional burdens.	36
Guideline 10. Governments and others who hold surveillance data must ensure that identifiable data are appropriately secured.	37
Guideline 11. Under certain circumstances, the collection of names or identifiable data is justified.....	38
Guideline 12. Individuals have an obligation to contribute to surveillance when reliable, valid, complete data sets are required and relevant protection is in place. Under these circumstances, informed consent is not ethically required.	40
Guideline 13. Results of surveillance must be effectively communicated to relevant target audiences.	41
Guideline 14. With appropriate safeguards and justification, those responsible for public health surveillance have an obligation to share data with other national and international public health agencies.	43
Guideline 15. During a public health emergency, it is imperative that all parties involved in surveillance share data in a timely fashion.	44
Guideline 16. With appropriate justification and safeguards, public health agencies may use or share surveillance data for research purposes.	45
Guideline 17. Personally identifiable surveillance data should not be shared with agencies that are likely to use them to take action against individuals or for uses unrelated to public health.	46

Foreword

Public health surveillance is the bedrock of outbreak and epidemic response, but it reaches far beyond infectious diseases. It is sometimes called the radar of public health: it allows health officials to map disease, spot patterns, identify causes, and target interventions. Surveillance, for example, is central to understanding the increasing global burden of noncommunicable conditions. By helping to determine patterns and causes of morbidity and mortality, it can help guarantee access to safe food, clean water, pure air, and healthy environments.

Surveillance, when conducted ethically, is the foundation for programs to promote human well-being at the population level. It can contribute to reducing inequalities: pockets of suffering that are unfair, unjust and preventable cannot be addressed if they are not first made visible. But surveillance is not without risks for participants and sometimes poses ethical dilemmas. Issues about privacy, autonomy, equity, and the common good need to be considered and balanced, and knowing how to do so can be challenging in practice.

I am pleased to see WHO leading in this important area by placing ethics at the heart of public health surveillance. The *WHO Guidelines on Ethical Issues in Public Health Surveillance* is

the first international framework of its kind, it fills an important gap. The goal of the guideline development project was to help policy-makers and practitioners navigate the ethical issues presented by public health surveillance. This document outlines 17 ethical guidelines that can assist everyone involved in public health surveillance, including officials in government agencies, health workers, NGOs and the private sector. I gratefully acknowledge the many experts and WHO colleagues who have made important contributions to this publication.

WHO has rightly asserted that public health surveillance, conducted in a manner that anticipates ethical challenges and proactively seeks to reduce unnecessary risks, provides the architecture for social well-being. It is now up to the global community and countries to take up this challenge and implement the guidelines in their surveillance systems.

Dr Marie-Paule Kiény
Assistant Director-General
Health Systems and
Innovation

Acknowledgements

This document was prepared by the WHO Global Health Ethics team, led by Andreas Reis and coordinated by Abha Saxena of the Department of Information, Evidence and Research in the cluster of Health Systems and Innovation.

WHO extends special thanks to the co-chairs of the WHO Guidelines Development Group: Amy L. Fairchild, Texas A&M University School of Public Health, USA, and Co-director for the Columbia University WHO Collaborating Centre for Bioethics, and Ali Akbar Haghdoost, Kerman University of Medical Sciences, Islamic Republic of Iran.

Amy Fairchild was lead writer and chief editor. Ali Akbar Haghdoost contributed technical text and was responsible for ensuring the accuracy of the document with regard to the operation of surveillance systems. Angus Dawson and Lisa Lee contributed substantially to formulating the guiding principles and discussions. Calvin Ho Wai Loon provided core text on legal systems and issues. Jennifer Gibson contributed text on accountability and governance. Ronald Bayer, who was Chair of the Network of Collaborating Centres for most of the duration of this project, played a pivotal editorial role, with Ross Upshur and Carla Saenz. Ronald Bayer, Michael Selgelid, and Angus Dawson substantively addressed comments from the Guideline Development Group and external reviewers. Michael Selgelid, Andreas Reis, Amy Fairchild and Ronald Bayer prepared grant proposals to fund the work.

WHO gratefully acknowledges the contribution of the WHO Guidelines Development Group, which shared extensive knowledge, original text and comments on the document. All are also co-authors of the document:

Kokou Agoudavi, Ministry of Health, Togo; Jimoh Amzat, Usmanu Danfodiyo University, Nigeria; Ronald Bayer, Columbia University Mailman School of Public Health, USA; Philippe Calain, Médecins Sans Frontières, Switzerland; Yali Cong, Peking University Health Science Centre, China; Angus Dawson, University of Sydney, Australia; Claire Gayrel, University of Namur, Belgium; Jennifer L. Gibson, Joint Centre for Bioethics, University of Toronto, Canada; Kenneth Goodman, University of Miami, USA; Vijayaprasad Gopichandran, Tamil Nadu School of Public Health, India; Einar Heldal, Institute of Public Health, Norway; Calvin Ho Wai Loon, National University of Singapore Centre for Biomedical Ethics, Singapore; Hussain Jafri, Council for Alzheimer's, Pakistan; Lisa M. Lee, Presidential Commission for the Study of Bioethical Issues, USA; Sergio Litewka, University of Miami, USA; Mina Mobasher, Kerman University of Medical Sciences, Islamic Republic of Iran; Keymanthri Moodley, Stellenbosch University, South Africa; Boateng Okyere, University of Ghana, Ghana; Maria Consorcia Quizon, Training programs in Epidemiology and Public Health Interventions Network, Philippines; Pathom Sawanpanyalert, Food and Drug Administration, Thailand;

Michael Selgelid, Monash University, Australia; Ross Upshur, University of Toronto, Canada; Effy Vayena, University of Zurich, Switzerland.

The Global Network of WHO Collaborating Centres for Bioethics and their members are gratefully acknowledged.

WHO thanks the support provided by various observers: Ehsan S Gooshki, Tehran University, Islamic Republic of Iran; Katherine Littler, Wellcome Trust, United Kingdom; Debra Masure, Centers for Disease Control and Prevention, USA; Patricia Sweeney, Centers for Disease Control and Prevention, USA; and Hans van Delden, Utrecht University Medical Centre, Netherlands.

The support and contributions of two consultants is greatly appreciated: Carl H. Coleman, Seton Hall Law School, USA, and Michele Loi, Swiss Federal Institute of Technology, Switzerland.

This guidance document benefited from the work of a literature review group, comprising: Corinna Klingler, Ludwig Maximilian University Munich, Germany (lead); Diego S. Silva, Simon Fraser University, Canada; Daniel Strech and Christopher Schürmann, Hannover Medical School, Germany; and Michael Vaughn, Columbia University School of Public Health, USA.

WHO's Global Health Ethics team extends thanks to the WHO internal steering group for its invaluable advice on development of the guidelines: Isabel Bergeri, Marie-Charlotte Bouesseau, Somnath Chatterji, Joan Helen

as well as WHO colleagues Ronald Johnson, Vasee Moorthy, Mahnaz Vahedi, Amin Vakili, and Jihane Tawilah.

The document also benefited from the work of an external review group, comprising: Larry Gostin, Georgetown Law Center, USA; Philip Zucs, Gaetan Guyodo, Marieke van der Werf, European Centre for Disease Prevention and Control, Sweden; Nijuan Xiang, Public Health Emergency Centre, Centers for Disease Control, China; Martyn Kirk, College of Medicine, Biology and Environment, Australian National University, Australia; Thilaka Chinnaya, Ministry of Health, Malaysia; Mohammed Ben Ammar, formerly at the Ministry of Health, Tunisia; Lorna Luco, Universidad del Desarrollo, Institute of Bioethics, Chile; and Preet Dhillon and Shifalika Goenka, Public Health Foundation, India.

Special thanks are extended to former interns of the Global Health Ethics team who contributed to this document: Nicholas Aagaard, Sara Birch Ares, Hannah Coakley, Christine Fisher, Antonia Fitzek, Theresa Fuchs, Sandrine Gehriger, Christina Heinicke, Sophie Hermann, Katalin Hetzelt, Felicitas Holzer, Patrik Hummel, Helene Maree Jacmon, Euzebiusz Jamrozik, Selena Knight, Pat McConville, Sarah McNeill, Jan Nieke, Julia Pemberton, Maansi Shahid, Alexander Shivarev, and Michael Vaughn.

WHO gratefully acknowledges Phuong Bach Huynh, School of Public Health, Texas A&M University, for the design of the cover page.

Preparation of this guidance document would not have been possible without the generous
