Sales, rights and licensing. To purchase WHO publications, see http://apps.who.int/bookorders. To submit requests for commercial use and queries on rights and licensing, see http://www.who.int/about/licensing.

Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

Global diffusion of eHealth:

Making universal health coverage achievable

Report of the third global survey on eHealth

Global Observatory for eHealth

2016

World Health Organization

Acknowledgments

This report would not have been possible without the input of the Observatory's extensive network of eHealth experts and the support of numerous colleagues at the WHO headquarters, regional and country offices. Sincere thanks are due to over 600 eHealth experts in 125 countries worldwide who assisted with the design, implementation and completion of the third global survey. The survey could not have been effectively implemented without the active involvement of WHO's eHealth focal points in the six regions including Housseynou Ba, Hani Farouk, Jun Goa, Clayton Hamilton, Mark Landry and David Novillo.

Our gratitude goes to our report authors who provided their expertise and insight in reporting and analysing the results. They are Peter Drury (Chapters 1,7,8), Robyn Whittaker (Chapter 2), Richard Wootton (Chapter 3), Lorainne Tudor Car (Chapter 4), Rajendra Pratap Gupta and Misha Kay (Chapter 5), Petra Wilson (Chapter 6) and Jo-Anna Wood (case studies).

We are grateful to our eHealth reviewers including Patricia Abbott, Sean Broomhead, Bob Gann, Nadi Kaonga, Yunkap Kwankam and Tove Sorensen for their critical review of the texts.

Special thanks go to Mohamed Nour and Katharine Shelley for their processing and presentation of the survey data. The GOe wishes to acknowledge its gratitude for the expert advice from Joan Dzenowagis, Diana Zandi who also acted as technical editors for this publication, and to Ed Kelley for his insight and ongoing support. Our appreciation goes to Jillian Reichenbach Ott, Genève Design, for her design and layout, Kai Lashley, Further Consulting, for technical editing and Rebecca Gordon for proofreading.

We are grateful for the financial support provided by USAID which paid for the development and publication of this report.

The global survey and this report were prepared by the WHO Global Observatory for eHealth under the management of Misha Kay who was also editor-in-chief for this publication.
