Selection and application of methods for the detection and enumeration of human-pathogenic halophilic *Vibrio* spp. in seafood

GUIDANCE

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations (FAO) or of the World Health Organization (WHO) concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement. The mention of specific companies or products of manufacturers, whether or not these have been patented, does not imply that these are or have been endorsed or recommended by FAO or WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters. All reasonable precautions have been taken by FAO and WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall FAO and WHO be liable for damages arising from its use.

The views expressed herein are those of the authors and do not necessarily represent those of FAO or WHO.

WHO Library Cataloguing-in-Publication Data:

Selection and application of methods for the detection and enumeration of human-pathogenic halophilic *Vibrio* spp. in seafood: guidance.

(Microbiological risk assessment series, 22)

1.Food Contamination. 2.Seafood - microbiology. 3.*Vibrio parahaemolyticus* - isolation and purification. 4.*Vibrio vulnificus* - isolation and purification. I.World Health Organization. II.Food and Agriculture Organization of the United Nations.

ISBN 978 92 4 156528 8 (WHO)

(NLM classification: WA 703)

ISBN 978-92-5-109354-2 (FAO)

ISSN 1726-5274

Contents

Acknowledgements	vi
Contributors	vii
Preface	ix
Abbreviations used in this report	x
Executive summary	xi
<hr/>	
1 Introduction	1
<hr/>	
2 Possible end uses of <i>Vibrio parahaemolyticus</i> and <i>Vibrio vulnificus</i> testing methodologies	5
2.1 Harvest-area monitoring	6
2.2 Post-harvest process verification	6
2.3 End-product monitoring	8
2.4 Outbreak investigation	11
<hr/>	
3 Methods	13
3.1 Enumeration by direct plating on selective agar	13
3.2 Conventional selective enrichment	15
3.3 Conventional Most Probable Number (MPN)	18
3.4 Direct plating probe-hybridization	20
3.5 Conventional PCR	22
3.6 Real-time PCR	23
3.7 Loop-Mediated Isothermal Amplification Assay	24
3.8 Comparison of methods	25

4	Considerations with regard to method performance characteristics for different end uses	28
4.1	Introduction	28
4.2	Performance characteristics of methods	29
4.3	Requirements of end uses	36
4.4	Conclusions	40

5	Recommended approach for the in-house verification of methods for <i>Vibrio</i> spp. for use in national risk assessments	43
5.1	Introduction	43
5.2	General considerations relating to verification	46
5.3	Verification steps for all methods	48
5.4	Additional verification steps for presence/absence methods	50
5.5	Additional verification steps for quantitative methods	51
5.6	Determination of laboratory and analyst proficiency	53

6	Recommendations on the collection of data to support regional and national risk assessments	54
6.1	Introduction	54
6.2	Data inputs for the present risk calculators	55
6.3	Levels of production and levels and patterns of consumption	57
6.4	Abiotic factors	57
6.5	Concentrations at harvest (including pathogenicity factors)	59
6.6	Concentration in products on the market	59
6.7	Concentration in foods that have caused illness (and ratios of total vs pathogenic)	60
6.8	Time and temperature profiles in the food chain	60
6.9	Epidemiology	60
6.10	Growth in bivalve species	61
6.11	Susceptible population	61
6.12	Data exchange networks	61
6.13	Data relevance	61
6.14	Quality of data	63

Acknowledgements

The Food and Agriculture Organization of the United Nations and the World Health Organization would like to express their appreciation to all those who contributed to this document through the provision of their time, expertise, relevant information and by reviewing the document and providing comments. In particular appreciation is extended to Dr Ron Lee for his leading role in preparing this document based on the discussions of an expert meeting convened in Canada in 2011. Support from Health Canada for organising the Expert meeting and support from the International Life Sciences Institute and from Kyoto University, Japan for organising the subsequent pilot workshops in Asia and Latin America is gratefully acknowledged as well as the contributions of some of the experts in facilitating the piloting.

The preparation of this document was coordinated by the Secretariat of the Joint FAO/WHO Expert Meetings on Microbiological Risk Assessment (JEMRA). This included Marisa Caipo, Sarah Cahill and Iddya Karunasagar in FAO and Kazuko Fukushima and Rei Nakagawa in WHO. Final language editing was by Thorgeir Lawrence and layout by Joanne Morgante.
