Introduction	1
Gender inequality and HIV	2
Gender inequality and sexual and reproductive health.	3
Why has this tool been developed?	4
Who can use this tool?	4
How is the tool structured?	5
How can the tool be used?	5
 Module 1 Asking the right questions about monitoring and evaluation of gender inequality	 10
Introduction	10
What are the key concepts you need to know?	10
What you can do? Apply the public health questions approach to monitoring and evaluation	12
Public health question 1: Understanding gender inequality dimensions	15
Step 1: Assess gender-based health inequities	15
Step 2: Identify the contributing factors	16
Public health question 2: Understanding potential responses	17
Step 3: Identify promising interventions	18
Step 4: Determine what is needed to implement interventions effectively	19
Public health question 3: Monitoring gender-responsive programming	21
Step 5: Monitor the quality of gender-responsive programmes	21
Step 6: Monitor the outputs of gender-responsive programmes	23
Public health question 4: Evaluating results of gender-responsive programming	24
Step 7: Evaluate the outcomes of gender-responsive programmes	24
Step 8: Evaluate the impact of gender-responsive programmes	25
 Module 2 Identifying an appropriate set of gender-sensitive indicators	 30
Introduction	30
What are the key concepts you need to know?	30
What can you do? Construct a set of gender-sensitive indicators	33
Step 1: Assess whether existing indicators are gender-sensitive.	33
Step 2: Identify gaps in measuring and monitoring gender-based health inequalities and gender inequality in current M&E framework	35

Step 3: Formulate indicator sets	42
Adding new indicators to an existing indicator set.	43
A note on data sources	45
Module 3 Generating meaningful data through gender analysis	48
Introduction	48
What are the key concepts you need to know?	48
What can you do? Conduct a gender analysis	50
Step 1: Descriptive analysis	51
Step 2: Analysis of trends, across subgroups and compared with other countries. . .	52
Step 2a. Analysis of trends	53
Step 2b. Analysis across subgroups.	54
Step 2c. Comparison with other similar populations in different settings	55
Step 3: Data triangulation: analysis of gender inequality as a social determinant of health	57
Step 3a. Analyse knowledge and risk behaviours (proximate determinants)	57
Step 3b. Analyse social and cultural, policy and legal context (structural factors) . . .	58
Conclusions.	62
Module 4 Making M&E systems gender-sensitive	68
Introduction	68
What do you need to know?	68
What can you do?	70
Step 1: Assess the gender-sensitivity of your M&E system	70
Step 2: Improve the gender-sensitivity of your M&E system	72
Conclusions.	74
Glossary	76
Annex 1 Sexual and reproductive health: assess gender-based health inequities.	79
Annex 2 Sexual and reproductive health: identify the contributing factors	80
Annex 3 Sexual and reproductive health: identify promising interventions	81
Annex 4 Sexual and reproductive health: monitor the quality of gender-responsive programmes	83
Annex 5 Sexual and reproductive health: monitor the outputs of gender-responsive programmes	85

Annex 6	Sexual and reproductive health: evaluate the outcomes of gender-responsive programmes	86
Annex 7	Sexual and reproductive health: evaluate the impact of gender-responsive programmes	87
Annex 8	Sexual and reproductive health: gap analysis of how well do major SRH indicator sets measure and monitor gender-based health inequities and gender inequality	88
Annex 9	Sexual and reproductive health: gender analysis.	92
Annex 10	A template for conducting a gap analysis of your own HIV or SRH indicator set	106
References	108

Boxes

Box 1	Asking the right questions to understand how gender inequality shapes the HIV epidemic.	15
Box 2	Asking the right questions to identify the role of gender inequality as an underlying factor in shaping HIV vulnerability and inequities in HIV outcomes.	17
Box 3	Asking the right questions to identify effective or promising gender equality interventions in the context of HIV	18

Box 4	Asking the right questions about the requirements for implementing effective gender equality interventions for improving HIV outcomes	20
Box 5a	Process monitoring.	21
Box 5b	Asking the right questions to guide process monitoring of gender-responsive HIV programmes	22
Box 6a	Output monitoring	23
Box 6b	Asking the right questions to guide output monitoring of gender-responsive HIV programmes	23
Box 7	Asking the right questions to guide outcome evaluations of gender-responsive HIV programmes.	25
Box 8	Asking the right questions to evaluate the impact of gender-responsive HIV programmes	26
Box 9	Criteria for good indicators	31
Box 10	Gender-sensitive indicators for HIV.	32
Box 11	Intimate partner violence: a risk factor associated with HIV and a proxy for gender inequality	34
Box 12	Resources for gender-sensitive SRH and HIV indicators and gender equality indicators	36
Box 13	Standards for a coherent and balanced indicator set.	42
Box 14	A coherent and balanced indicator set for measuring and monitoring gender-based health inequalities and gender inequality.	43
Box 15	Criteria for adding new indicators	44
Box 16	Absolute versus relative inequality	49
Box 17	Intimate partner violence, relationship power inequity and HIV infection among young women in the Eastern Cape of South Africa	59
