

WHO Technical specifications of Neonatal Resuscitation Devices

WHO Technical specifications of Neonatal Resuscitation Devices

WHO Library Cataloguing-in-Publication Data

WHO technical specifications of neonatal resuscitation devices.

1. Resuscitation – instrumentation. 2. Infant, Newborn. 3. Asphyxia Neonatorum – prevention and control.
4. Infant Mortality – prevention and control. I. World Health Organization.

Executive summary	5
Introduction	6
How to read this document	8
Who is this document intended for?	8
Purpose of the document	9
Scope of the document	9
Chapter 1: Technical specifications for a self-inflating neonatal resuscitation bag with mask	10
1.1 Scope	10
1.2 Background for a neonatal resuscitation bag with mask	10
1.2.1 Self-inflating bag	11
1.2.2 Valve	12
1.2.3 Mask	12
1.3 Standards and regulations compliance	13
1.4 Other considerations	13
1.4.1 How to use a resuscitation bag with mask	13
1.4.2 Reprocessing	14
1.4.3 Storage and packaging	15
1.4.4 Maintenance	15
1.4.5 Capacity-building and quality assurance related to the neonatal resuscitator	15
1.5 Key tender/request for quotation specifications for a neonatal resuscitation bag with masks	16
1.5.1 Neonatal resuscitation bag with mask specifications	16
Chapter 2: Technical specifications for a suction machine	18
2.1 Scope	18
2.2 Background for a suction machine	18
2.3 Equipment requirement	19
2.3.1 Electrical suction machine	19
2.4 How to use an electrical suction machine	20
2.4.1 Manual/foot-operated suction machines	21
2.5 Standards and regulations compliance	22
2.6 Other considerations	22
2.6.1 Reprocessing	22
2.6.2 Maintenance	22
2.6.3 Suction catheter	23
2.7 Key tender/request for quotation specifications for a suction machine, electrically operated	23
2.7.1 Suction machine specifications	23

Chapter 3: Technical specifications for a suction device	25
Brief description	25
3.1 Scope	25
3.2 Background	25
3.3 Standards and regulations compliance	26
3.4 Reprocessing	26
3.5 Maintenance	26
3.6 Capacity-building and quality assurance related to the suction devices ..	26
3.7 Key tender/request for quotation specifications for a suction bulb	27
3.7.1 Single-use suction bulb specifications	27
3.7.2 Suction device specifications	28
 Chapter 4: Procurement guidance for neonatal resuscitation devices	29
 Chapter 5: For further research	30
 Annex 1. Glossary of terms	31
 Annex 2. Facemask size discussion	34
 Annex 3. Bag size review – resuscitation bag with mask	35
 Annex 4. 2012 WHO Guidelines on basic newborn resuscitation	37
 Annex 5. Technical specifications for a self-inflating neonatal resuscitation bag with masks	39
 Annex 6. Technical specifications for a suction machine, electrically operated ..	43
 Annex 7. Technical specifications for a single-use suction device	47
 Annex 8. Technical specifications for a suction device	50
 Annex 9. Meeting Report - Consultation for technical specifications for procurement and regulatory pathway of medical devices determined by the United Nations Commission on Life Saving Commodities (June 10-12, 2013) ..	53
 Annex 10. Sixty-Sixth World Health Assembly Implementation of the recommendations of the United Nations Commission on Life-Saving Commodities for Women and Children (WHA66.4)	68
 Annex 11. UNCLSC Poster – Second Global Forum on Medical Devices	71

The *WHO technical specifications of Neonatal Resuscitation Devices* was developed under the framework of the World Health Assembly Resolution WHA66.7,(5) which is at the foundation of the United Nations Commission on Life-Saving Commodities (UNCLSC) for Women and Children (Annex 10). The mandate of the UNCLSC is to promote and assure the availability of 13 safe, quality commodities, which include resuscitation devices.

These specifications are the result of a collaboration of experts from different backgrounds and organizations, including WHO, UNICEF, CHAI, PATH and Save the Children, with funding support from the Reproductive, Maternal, Newborn, Child and Adolescent Health (RMNCH) Trust Fund, derived from the UNCLSC.

Cai Long and Didier Mukama drafted this document under the supervision of Adriana Velazquez Berumen, Senior Advisor of Medical Devices at the Policy and Access Unit of the Essential Medicines and Health Products at WHO.

It is noted that in June 2013, an expert group from the Neonatal Resuscitation Group along with representatives from six African countries, gathered at WHO headquarters to discuss for the first time the technical specifications of neonatal resuscitation devices; WHO is grateful to every participant (Annex 9 includes the report of this meeting).

WHO addresses its sincere gratitude to the following people for their knowledgeable contribution during the development of these technical specifications and for their primary review of this document:

Severin Ritter Von Xylander (WHO); Donna Vivio (USAID); Manjari Quintanar Solares (PATH); Jillian Zemanek (PATH); Fay Venegas (PATH); Kellen Thomas (CHAI); Linda Wright (NIH); Keith Neroutsos (PATH); Indira Narayanan (Global Newborn Health); Stella Abwao (Save the Children); Susan Niermeyer (University of Colorado); Shauna Mullally (UNICEF); Monique Supiot (UNICEF); Yukiko Nakatani (WHO); Annie Clark (University Research Co. LLC); William Keenan (Saint Louis University); Sherri Bucher (Indiana University); Mohammed Ameal (NHSRC India); Tomomichi Nakazaki (Tokyo Women's Medical University-Waseda University); Lloyd Jensen (University of Utah).

Funding of this project was granted to WHO by the RMNCH Trust Fund to support the implementation of the actions of the UNCLSC.

Technical editor AvisAnne Julien; drawings designer, Cristina Ortiz; and overall design L'IV Com Sàrl.

Abbreviations

CE	Conformité Européenne/European Conformity
CFR	Code of Federal Regulations – FDA (United States)
CHAI	Clinton Health Access Initiative
