Requests for permission to reproduce or translate WHO publications — whether for sale or for non-commercial distribution — should be addressed to WHO Press through the WHO website (www.who.int/about/licensing/copyright_form/en/index.html).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

Table of contents

Foreword	viii
Acknowledgements	x
Executive summary	xii
1. Introduction	1
2. Background	3
2.1 Inequality	3
2.2 Health inequality	4
2.3 Reproductive, maternal, newborn and child health	5
3. Monitoring the state of inequality in RMNCH	9
3.1 Data	10
3.1.1 Data sources	10
3.1.2 Health indicator data	10
3.1.3 Dimension of inequality data	10
3.1.4 Country selection	12
3.2 Analysis	13
3.2.1 Data disaggregation	13
3.2.2 Summary measures	13
3.3 Reporting	16
3.3.1 Data visualization	16
3.3.2 Feature stories	17
4. The state of inequality in RMNCH: stories from low- and middle-income countries	19
4.1 Reproductive health interventions	20
4.2 Maternal health interventions	24
4.3 Care-seeking for sick children	29
4.4 Childhood immunization	33
4.5 Child malnutrition	37
4.6 Child mortality	41
4.7 RMNCH interventions, combined	45
4.8 Potential for improvement in RMNCH interventions	50

5. Reporting the state of inequality: taking stock	55
5.1 The importance of data disaggregation	56
5.2 Equity orientation of policies, programmes and practices	57
5.3 Equity-oriented health information systems	58
5.4 Reducing inequality across health topics and the post-2015 sustainable development agenda	59
References	61
Appendices	65
Appendix 1. Data and analysis methods	65
Appendix 2. Assessing health inequality: methodological considerations	72
Appendix 3. Visualizing disaggregated data using maps	76
Appendix 4. Guide to interpreting the visuals used in this report	78
Appendix 5. Interactive visualization of health data	81
Appendix 6. Additional interactive visuals: references for further data exploration	83
Appendix 7. Patterns of inequality	85
Supplementary tables	87
Index	100

Figures

Figure 4.1	Contraceptive prevalence (modern methods) by woman's education in 71 low- and middle-income countries: latest situation (DHS and MICS 2005–2013)	21
Figure 4.2	Contraceptive prevalence (modern methods) by woman's education in 38 low- and middle-income countries: change over time (DHS and MICS 1995–2004 and 2005–2013)	22
Figure 4.3	Births attended by skilled health personnel by economic status in 30 low-income and 53 middle-income countries: latest situation (DHS and MICS 2005–2013)	25
Figure 4.4	Births attended by skilled health personnel in 83 low- and middle-income countries (national average and within-country economic-related inequality): latest situation (DHS and MICS 2005–2013)	26
Figure 4.5	Births attended by skilled health personnel: change over time in national average (absolute change) and in the poorest compared with the richest quintile (absolute excess change) in 42 low- and middle-income countries (DHS and MICS 1995–2004 and 2005–2013)	27
Figure 4.6	Children aged less than five years with pneumonia symptoms taken to a health facility by place of residence in 72 low- and middle-income countries: latest situation (DHS and MICS 2005–2013)	30
Figure 4.7	Children aged less than five years with pneumonia symptoms taken to a health facility: change over time in national average (absolute change) and in rural compared with urban areas (absolute excess change) in 33 low- and middle-income countries (DHS and MICS 1995–2004 and 2005–2013)	31
Figure 4.8	DTP3 immunization coverage among one-year-olds by economic status in 78 low- and middle-income countries: latest situation (DHS and MICS 2005–2013)	34
Figure 4.9	DTP3 immunization coverage among one-year-olds: change over time in national average (absolute change) and in the poorest compared with the richest quintile (absolute excess change) in 41 low- and middle-income countries (DHS and MICS 1995–2004 and 2005–2013)	35
Figure 4.10	Stunting prevalence in children aged less than five years by mother's education in 30 low-income and 36 middle-income countries: latest situation (DHS and MICS 2005–2013)	38
Figure 4.11	Stunting prevalence in children aged less than five years: change over time in national average (absolute change) and in the least-educated compared with the most-educated subgroup (absolute excess change) in 29 low- and middle-income countries (DHS and MICS 1995–2004 and 2005–2013)	39
Figure 4.12	Under-five mortality rates by place of residence in 54 low- and middle-income countries: latest situation (DHS 2005–2013)	42
Figure 4.13	Under-five mortality rates: change over time in national average (absolute change) and in rural compared with urban areas (absolute excess change) in 37 low- and middle-income countries (DHS 1995–2004 and 2005–2013)	44

Figure 4.14	RMNCH composite coverage index by multiple dimensions of inequality in low- and middle-income countries: latest situation (DHS and MICS 2005–2013)	46
Figure 4.15	Potential for improvement in RMNCH intervention coverage by eliminating within-country economic-related inequality in Egypt (DHS 2008) and Niger (DHS 2012)	52
Figure 5.1	Under-five mortality rate doubly disaggregated by place of residence and economic status in Benin (DHS 2006).	57
Figure A2.1	Antenatal care coverage (at least four visits) by woman's education in Indonesia (DHS 2002 and 2012).	73
Figure A2.2	Proportion of women aged 15–49 years with a live birth within three years preceding the survey by education in Indonesia (DHS 2002 and 2012)	74
Figure A3.1	Stunting prevalence in children aged less than five years by mother's education in 74 low- and middle-income countries: latest situation (DHS and MICS 2005–2013)	76
Figure A7.1	Patterns of inequality in health intervention coverage by economic status	85

Tables

Table 2.1	Development initiatives and RMNCH: a recent history	6
Table 3.1	Selected RMNCH indicators used in this report	11
Table 3.2	Health indicator categories and relevant dimensions of inequality	11
Table 3.3	The calculation of selected summary measures and their application in this report	14
Table 4.1	Potential for improvement in national RMNCH intervention coverage by eliminating within-country economic-related inequality (population attributable risk) in low- and middle-income countries with available data (DHS and MICS 2005–2013)	50
Table A1.1	Health determinants included in correlation analyses with RMNCH indicators, grouped according to the EQuity-oriented Analysis of Linkages between health and other sectors (EQuAL) Framework	68
Table A1.2	Difference and ratio summary measure calculations by dimension of inequality.	69
Table A2.1	Guide to interpreting annual absolute excess change estimates	75
