

# **A MANUAL** for Estimating Disease Burden Associated With Seasonal Influenza

World Health  
Organization

The WHO logo consists of the letters 'WHO' in a bold, blue, sans-serif font. The letters are closely spaced and have a slight shadow effect. The logo is positioned on the left side of a horizontal band that has a light beige background and a thin, dark, diagonal-hatched border at the top and bottom.

**WHO**

A Manual for  
Estimating  
Disease Burden  
Associated With  
Seasonal Influenza

WHO Library Cataloguing-in-Publication Data:

A manual for estimating disease burden associated with seasonal influenza.

1.Influenza, Human – epidemiology. 3.Influenza, Human – complications. 3.Cost of Illness. 4.Seasons.  
5. I.World Health Organization.

ISBN 978 92 4 154930 1

(NLM classification: WC 515)

Publications of the World Health Organization are available on the WHO website ([www.who.int](http://www.who.int)) or can be purchased from WHO Press, World Health Organization, 20 Avenue Appia, 1211 Geneva 27, Switzerland (tel.: +41 22 791 3264; fax: +41 22 791 4857; e-mail: [bookorders@who.int](mailto:bookorders@who.int)).

Requests for permission to reproduce or translate WHO publications –whether for sale or for non-commercial distribution– should be addressed to WHO Press through the WHO website ([www.who.int/about/licensing/copyright\\_form/en/index.html](http://www.who.int/about/licensing/copyright_form/en/index.html)).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

Design and layout: Services Concept

## Acknowledgments

This manual has been developed by the Global Influenza Programme of the World Health Organization in Geneva in collaboration with the University of Edinburgh. Harry Campbell and Harish Nair from the University of Edinburgh have been leading this process; they were instrumental in initiating, coordination, drafting, and finalization of this document.

WHO wishes to acknowledge the valuable contribution of the technical advisory panel consisting of William Kwabena Ampofo, Shobha Broor, Bradford D Gessner, Siddhivinayak Hirve, Christoph Steffen, and Marc-Alain Widdowson.

Special thanks go out to the many participants for feedback during the desktop pilot testing of the manual:

- From the All India Institute of Medical Sciences (AIIMS), Delhi, India: Anand Krishnan, Sanjay K. Rai, Debjani R. Purakayastha, Rajan Wigh, and Meenakshi N.
- From US Centres for Disease Control (US CDC), India Office: Renu B. Lal and Siddhartha Saha
- From Inclen Trust, Delhi, India: Purva Dwivedi and Vivek Gupta
- From the health and demographic surveillance system (HDSS) Vadu, A Division of KEM Hospital Research Centre, Pune, India: Sanjay Juvekar, Neeraj Kashyap, and Pallavi Lele
- From the integrated disease surveillance Project (IDSP), Zilla Parishad Pune, India: Varsha Mhaske
- From National Institute of Virology, Pune, India- Avinash Deoshatwar
- From Noguchi Memorial Institute for Medical Research (NMIMR), Accra: James Aboagye, Richard Akuffo, and Joseph Asamoah Frimpong
- From the World Health Organization (WHO), Ghana Office: Sally-Ann Ohene
- From Ghana Health Service (GHS), Accra, Ghana: Michael Adjabeng, Joseph Akwesi Amankwa, Isaac Baffoe – Nyarko, and Badu Sarkodie
- From Ghana Statistical Service (GSS), Accra, Ghana: Jacqueline Anum, Ghana Yaw Misefa, and Philomena Nyarko
- From Dodowa Health Research Centre (DHRC), Ghana- Jonas Akpakli

Special thanks also to Eduardo Azziz-Baumgartner and Danielle Iulliano for the final review of this document.

# Table of contents

<b>Abbreviations and Acronyms</b>	<b>7</b>
<b>Introduction</b>	<b>8</b>
Background	8
Need for reliable national disease burden estimates for influenza	8
Target users of the manual	9
Objectives and limitations of the manual	9
Expected outcome of the manual	9
How to use this manual	9
Case definitions	10
WHO case definitions for influenza sentinel surveillance	11
Case definitions for influenza disease burden estimation in this manual	11
Mapping other case definitions to the current WHO case definition	12
Natural History of Influenza Infection	12
<b>1 Concepts in influenza disease burden estimation</b>	<b>13</b>
1.1. Morbidity	14
1.1.1. Incidence rate	14
1.2. Mortality	14
<b>2 Identifying and selecting data sources</b>	<b>17</b>
2.1. Identifying data sources	18
2.2. Checking available data	18
2.2.1. Age groups	19
2.2.2. Summary data	19
2.3. Reviewing the data for quality and relevance	20
2.3.1. Completeness	22
2.3.2. Representativeness	23
2.3.3. Accuracy of case count	24
2.3.4. Assessing the potential for bias	25
<b>3 Disease burden estimation using SARI sentinel surveillance data</b>	<b>29</b>
3.1. Finalising data for disease burden estimation	30
3.2. Extracting data	31
3.3. Defining the numerator: Case count	31
3.3.1. Data are based on all SARI cases	32
3.3.2. Data are based on a proportion of SARI cases	32
3.4. Defining the denominator: catchment population	33

## Table of contents

3.4.1. Data on denominator population are readily available.....	34
3.4.2. Data on denominator population can be estimated .....	34
3.4.3. Defining a catchment area .....	34
3.4.4. Estimating the denominator catchment population for the sentinel site.....	37
3.5. Estimating disease burden.....	44
3.6. Estimating disease burden with population denominator.....	45
3.7. Estimating the proportion of SARI cases attributable to influenza when denominator population is not available.....	49
3.8. Calculating a confidence interval for the estimates .....	52
<b>4 Burden estimation for specific risk groups.....</b>	<b>57</b>
4.1 Influenza-associated SARI in pregnant women.....	58
4.2 Influenza-associated SARI with co-morbidities.....	60
4.2.1 If co-morbidity status has not been determined in all cases.....	61
4.2.2 If frequency of co-morbidity condition is known in ILI cases.....	61
4.3 Mortality in influenza associated SARI .....	63
4.3.1 In-hospital case fatality ratio .....	63
4.3.2 Proportional contribution of influenza to SARI mortality.....	64
4.3.3 Comparison of case fatality ratios in vulnerable groups with the healthy population .....	65
<b>5 Using hospital discharge data for disease burden.....</b>	<b>67</b>
5.1 Special considerations for using hospital data.....	68
5.2 Extracting data.....	69
5.3 Estimating disease burden.....	70
<b>6 Disease burden estimation using ILI sentinel surveillance data.....</b>	<b>71</b>
6.1 Identify data for disease burden estimation.....	73
6.2 Extracting data.....	73
6.3 Estimating disease burden.....	74
6.3.1 Defining numerator and denominator.....	74
6.3.2 Estimating disease burden with population denominators .....	74
6.3.3 Estimating the proportion of ILI cases attributable to laboratory confirmed influenza illness without population denominators.....	75
<b>7 Estimating disease burden using data from multiple sentinel sites .....</b>	<b>79</b>
7.1 Identifying data sources for national influenza disease burden estimates.....	80
7.2 Eligibility for pooling the burden estimates from different SARI sentinel sites or hospitals.....	80

7.3	With data from SARI sentinel sites.....	82
7.3.1	Generating national incidence estimates .....	82
7.3.2	Generating national disease estimates for proportion of influenza-associated SARI.....	84
7.4	With data from hospitals.....	85
<b>8</b>	<b>Interpreting the results.....</b>	<b>87</b>
8.1	Critical analysis of disease burden estimates.....	88
8.1.1	Conducting a plausibility check.....	88
8.1.2	Evaluating the role of chance.....	90
8.1.3	Evaluating the role of bias.....	91
8.2	Placing the influenza disease burden estimates in the context of burden estimates for other diseases.....	93
8.3	Delineating the influenza season.....	94
8.3.1	Method.....	94
8.3.2	Public health utility of delineating the influenza season.....	95
8.4	Analysing time trends over the years.....	95
	<b>Appendices.....</b>	<b>99</b>
	<b>References.....</b>	<b>122</b>
