## Preface

This case study was led by Beatriz M. García, MSc (chemist), independent consultant on intellectual property, technology intelligence and project management. Emma Uramís (microbiologist) and Esther M. Fajardo MSc (biologist), independent consultants on the biopharmaceutical industry, including regulatory requirements and vaccines, contributed to its drafting. The work was supervised by Dr José Luis Di Fabio, Pan American Health Organization (PAHO) and World Health Organization (WHO) representative in Cuba. The study was conducted at the request of Dr Zafar Mirza of WHO.

## Acknowledgements

The authors wish to thank the representatives of the Ministry of Public Health (MINSAP) and the Ministry of Higher Education of Cuba, and the directors and officers of the BioCubaFarma higher business management organization, who provided information for this case study. We would also like to acknowledge those who reviewed this document, especially Dr Agustín Lage Dávila, Director of the Center for Molecular Immunology, Dr Celeste Sánchez, Adviser, Center for State Control of Drugs, Equipment and Medical Devices, Dr Gustavo Sierra, Director of Science Policy, BioCubaFarma, and Dr Ileana Morales, Director of Science and Technology, MINSAP, who were kind enough to send us their comments and suggestions.
