Requests for permission to reproduce or translate WHO publications – whether for sale or for non-commercial distribution – should be addressed to WHO Press through the WHO website (www.who.int/about/licensing/copyright_form/en/index.html).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

CONTENTS

Tables and figures	8
Acknowledgments	10
Abbreviations	17
1. Strategic information: a consolidated framework	22
1.1 Introduction	22
1.2 Why collect and use strategic information?	23
1.3 Organization of the document	25
1.4 The strategic framework	27
1.4.1 The HIV result chain – from inputs to impact	27
1.4.2 The HIV cascade of services – improving linkages and quality of care	28
1.5 Selection, prioritization and analysis of indicators	29
1.5.1 Three categories of indicators: national, global, additional	30
1.5.2 Prioritizing indicators	33
1.6 Accountability and the 90–90–90 target	34
2. Prevention, care and treatment services along the HIV cascade	40
2.1 Introduction	40
2.1.1 The 10 global indicators	40
2.1.2 Data disaggregation for better programming	46
2.2 Know your epidemic	49
2.2.1 Key variables for measurement	49
2.2.2 Measurement methods	52
2.2.3 Stigma and discrimination	57
2.3 Tracking critical resource inputs	59
2.3.1 Health system inputs	59
2.3.2 Financing and costing	63
2.4 HIV prevention, care and treatment cascade	64
2.4.1 Services for key populations	64
2.4.2 Health sector prevention	74
2.4.3 Awareness of serostatus: HIV testing services	90
2.4.4 Linkage, enrolment and retention in care	104
2.4.5 Provision of ART	126
2.4.6 Viral suppression	149

2.4.7 Prevention of mother-to-child transmission	155
2.5 Evaluating impact	168
2.5.1 Mortality measurement	168
2.5.2 HIV prevalence and incidence	175
2.5.3 MTCT rate	179
2.5.4 Equity	183
2.5.5 Reviewing health and other outcomes	186
3. Effective strategic information	196
3.1 Introduction	196
3.2 Data sources	197
3.2.1 Facility reporting systems	202
3.2.2 Administrative sources	205
3.2.3 Population-based surveys	207
3.2.4 Facility assessments	209
3.2.5 Vital registration	212
3.3 Data systems	213
3.3.1 Individual patient records	213
3.3.2. Paper registers and reporting forms	215
3.3.3 Electronic data systems	216
3.3.4. Data management	221
3.3.5 Health management information systems	227
3.4 Data quality review	228
3.5 Data analysis and use	232
3.5.1 Analysis of the cascade	233
3.5.2 Data use at national, subnational and service delivery levels	235
3.5.3 Programme reviews	238
3.5.4 Evaluation and operational research and implementation science	240
3.5.5 Strategic information capacity	242
4. What next: how to use this guide	246
5. Annexes	250
Annex 1 - Consolidated list of health sector HIV indicators	250
Annex 2 - Indicator tables for tracking critical resources	263
Bibliography	277

TABLES AND FIGURES

Table 1.1	The three 90s: targets, indicators, and definitions	36
Table 2.1	Ten global monitoring indicators of the health sector response to HIV	41
Table 2.2	Key indicators of HIV prevention and treatment eligibility	55
Table 2.3	Indicators of stigma and discrimination against people living with HIV	57
Table 2.4	Indicators of service availability, quality and linkages	263
Table 2.5	Indicators of the health-care workforce	266
Table 2.6	Indicators of medical products and technologies	268
Table 2.7	Indicators of strategic information	272
Table 2.8	Indicators of governance, leadership and policy environment	273
Table 2.9	Indicators of financing and costing for HIV programmes	274
Table 2.10	Programme indicators for key populations	71
Table 2.11	Programme indicators for condom programming in the health sector	75
Table 2.12	Programme indicators of voluntary medical male circumcision	79
Table 2.13	Programme indicators of post-exposure prophylaxis (PEP) and pre-exposure prophylaxis (PrEP)	82
Table 2.14	Programme indicators of injection safety	83
Table 2.15	Programme indicators for blood transfusion safety	84
Table 2.16	Key indicators for sexually transmitted infections	88
Table 2.17	Programme indicators for HIV testing services	97
Table 2.18	Programme indicators of linkage to and enrolment in care	109
Table 2.19	Programme indicators for TB/HIV coinfection	116
Table 2.20	Programme indicators for other co-morbidities	125
Table 2.21	Programme indicators for antiretroviral therapy	131
Table 2.22	Summary of programme indicators for paediatric HIV	141
Table 2.23	Programme indicators for toxicity monitoring	144
Table 2.24	Indicators for HIV drug resistance from special surveys	146
Table 2.25	Programme indicators of viral load suppression	152
Table 2.26	Programme indicators for prevention of mother-to-child transmission	160
Table 2.27	Characteristics of mortality measurement data sources	172
Table 2.28	Strategies for civil registration and vital statistic system (CRVS) development plan in order to generate reliable, continuous and representative mortality statistics, including causes of death	173
Table 2.29	Programme indicators for AIDS-related deaths	173
Table 2.30	Indicators of HIV prevalence and incidence	177
Table 2.31	Summary of methodologies to measure the impact of PMTCT programmes	180
Table 2.32	Programme indicators of equity	185
Table 2.33	Periodic programme reviews	187
Table 2.34	Examples of health and non-health outcomes and impacts of successful health sector response to HIV	188
Table 2.35	Examples of indicators of health impacts of HIV and ART: nutrition	190
Table 2.36	Examples of indicators of non-health outcomes and impacts of successful ART: stigma and discrimination	191
