## Acknowledgements

This document is the result of an extensive consultative process on experience from countries and from international agencies supporting cervical cancer prevention and control programmes in countries. WHO, the Pan American Health Organization (PAHO), Jhpiego and PATH organized a discussion among programme experts, in September 2010 at WHO in Geneva, to agree on the content of a guide to improve national programmes to prevent cervical cancer. This document is also based on the experiences from projects in six African countries to introduce VIA and cryotherapy, which were supported by WHO.<sup>1</sup>

WHO would like to thank, in particular, the Flemish Government (Belgium) and the Institut National du Cancer (France) for providing funding for this document.

WHO, PAHO and Jhpiego have carried out the development of this document and would like to gratefully acknowledge the contributions of the following people and organizations:

### Co-authors

Partha Basu, Chittaranjan National Cancer Institute, Kolkata, India (Consultant/WHO Technical Adviser); Elisa Prieto Lara, Chronic Disease Prevention and Control, PAHO/WHO; Ricky Lu, Jhpiego; Silvana Luciani, Chronic Disease Prevention and Control, PAHO/WHO; and Nathalie Broutet, WHO.

### Meeting participants and primary reviewers

Paul Blumenthal (Stanford University School of Medicine), Nathalie Broutet (WHO), Mike Chirenje and Francisco Garcia (American Cancer Society), Antoon Grunberg (Sexual and Reproductive Health Program, Ministry of Health, Suriname), Jose Jeronimo (PATH), Sharon Kibwana (Jhpiego), Ricky Lu (Jhpiego), Silvana Luciani (WHO), Mauricio Maza (Basic Health, El Salvador), Swee Chong Quek (Gleneagles Hospital, Singapore), Rengaswamy Sankaranarayanan (International Agency for Research on Cancer), Carlos Santos (Peru National Cancer Institute), Vivien Tsu (PATH) and Hugo de Vuyst (International Agency for Research on Cancer).

# Contents

|  |     |
|--|-----|
| Abbreviations  | vii |
| Introduction   | 1   |
| 1. Framework for quality control and quality assurance                     | 3   |
| 1.1. Factors influencing the performance of VIA-based programmes           | 3   |
| 1.2. Defining standards and selecting indicators of performance and impact | 4   |
| 1.2.1. Scope of the standards and indicators                               | 5   |
| 1.2.2. Set of core indicators  | 6   |
| 1.2.3. Sources of information for indicators                               | 6   |
| 2. Operationalizing quality control and quality assurance                  | 8   |
| 2.1. Setting up supervision and monitoring systems                         | 9   |
| 2.2. Strategies for monitoring and evaluation                              | 10  |
| 2.2.1. Site visits for supervision and monitoring                          | 10  |
| 2.2.2. Peer assessment   | 14  |
| 2.2.3. Client assessments/community perspective                            | 14  |
| 2.2.4. Use of computers and/or mobile technologies to conduct supervision  | 14  |
| 2.3. Developing an action plan   | 15  |
| References   | 15  |
| Annexes  | 16  |
| Annex 1. Visual inspection with acetic acid (VIA) test procedure           | 16  |
| Annex 2. Cryotherapy procedure   | 17  |
| Annex 3. Summary of proposed core indicators                               | 19  |
| Annex 4. Additional indicators   | 24  |
| Annex 5. Sample data use poster  | 26  |
| Annex 6. Sample supervisory visit report template                          | 27  |
| Annex 7. Example of an action plan to introduce corrective measures        | 28  |
| Annex 8. List of most commonly used training materials                     | 30  |

## Figures

|  |    |
|--|----|
| Figure 1. Modified Donabedian conceptual framework for health care quality                         | 4  |
| Figure 2. Front and side view of female internal organs  | 13 |
| Figure 3. The transformation zone of the cervix of a parous woman of reproductive age              | 13 |
| Figure 4. Uterus of a woman of reproductive age  | 13 |
| Figure 5. Position of cryoprobe on the cervix and ice forming                                      | 17 |
| Figure 6. Prevalence of HPV infection, precancerous lesions and cervical cancer<br>by age of women | 23 |

## Tables

|   |    |
|---|----|
| Table 1. Planning for quality control and quality assurance                   | 9  |
| Table 2. Roles and responsibilities in the supervision and monitoring systems | 10 |
| Table 3. Supervisory visit planning checklist                                 | 11 |

## Abbreviations

|      |   |
|------|---|
| CKC  | Cold knife conization                   |
| CQI  | Continuous quality improvement          |
| DHS  | Demographic and Health Survey(s)        |
| FP   | Family planning                         |
| HIS  | Health information system               |
| HPV  | Human papillomavirus                    |
| LEEP | Loop electrosurgical excision procedure |
| QA   | Quality assurance                       |
| QC   | Quality control                         |
| RH   | Reproductive health                     |
| PBCR | Population-based cancer registry        |
| SCJ  | Squamocolumnar junction                 |
| VIA  | Visual inspection with acetic acid      |
| VILI | Visual inspection with Lugol's iodine   |
