Contents

Foreword	v
Abbreviations	vi
Acknowledgements	viii
Development of the module	ix
Introduction	1
Part 1: Introduction to basic epidemiology and statistics	
Learning Unit 1: Introduction to epidemiology.....	9
Learning Unit 2: Ratios, proportions and rates.....	11
Learning Unit 3: Data presentation: tables, graphs and charts.....	15
Learning Unit 4: Measures of central tendency.....	25
Learning Unit 5: Measures of variability and normal distribution	29
Learning Unit 6: Assessing the accuracy of a test.....	33
Part 2: Applied malaria epidemiology	
Learning Unit 7: Understanding malaria at regional and global levels.....	37
Learning Unit 8: Determinants of malaria distribution	43
Learning Unit 9: The life-cycle of the malaria parasite	51
Learning Unit 10: The life-cycle of the vector	57
Learning Unit 11: Natural history of malaria in the human host	65
Learning Unit 12: Intensity of malaria transmission	75
Part 3: Malaria surveillance, monitoring and evaluation	
Learning Unit 13: Overview of stages in malaria programme phases	91
Learning Unit 14: Surveillance system	97
Learning Unit 15: Indicators for monitoring and evaluation of malaria control programmes	101
Learning Unit 16: Data collection methods	107
Learning Unit 17: Burden of malaria.....	119
Part 4: Prevention and control of malaria epidemics	
Learning Unit 18: Introduction to malaria epidemics	123
Learning Unit 19: Early warning, detection, notification and verification of a malaria epidemic	133
Learning Unit 20: Prevention and early response to confirmed malaria epidemics	147
Learning Unit 21: Post-epidemic assessment and preparedness plan of action	159

Foreword

Malaria is a major global public health problem and a leading cause of morbidity and mortality in many countries. Malaria caused an estimated 219 (range 154–289) million cases and 660 000 (range 490 000–836 000) deaths in 2010. Approximately 80% of the cases and 90% of the deaths occur in Africa while the remaining cases and deaths occur mainly in the South-East Asia and Eastern Mediterranean Regions.¹ For the most recent figures on burden of malaria, search for the “World Malaria Report” available on WHO/GMP websites (<http://www.who.int/malaria/en/>).

The World Health Assembly and Roll Back Malaria (RBM) targets for malaria control and elimination are to achieve at least a 75% reduction in malaria incidence and deaths by 2015.

Elimination of malaria is defined as the reduction to zero of the incidence of locally acquired infection by human malaria parasites in a defined geographical area as a result of deliberate efforts. Elimination programmes require more technical malaria expertise than standard malaria control programmes, and require by national expertise in malaria epidemiology and entomology.

To achieve the objectives of malaria control and elimination programmes, appropriately planned and targeted delivery of essential malaria interventions is critical, including: diagnostic testing and prompt treatment of confirmed infections with effective artemisinin-based combination therapy (ACT); chemoprevention of malaria in pregnant women (Intermittent preventive treatment during pregnancy – IPTp), infants (Intermittent preventive treatment during pregnancy – IPTi) and children (Seasonal malaria chemoprevention – SMC), where appropriate; and application of appropriate vector control interventions, particularly the use of insecticide-treated nets (ITNs/LLINs) and indoor residual spraying (IRS).

This training module on the epidemiological approach for malaria control has been developed to support the staff involved in the planning and management and in the monitoring and evaluation of malaria control and elimination programmes.

Abbreviations

ABER	Annual blood examination rate
ACT	Artemisinin-based combination therapy
ANC	Antenatal clinic
API	Annual parasite index
CFR	Case fatality rate
CSP	Circumsporozoite protein
DALY	Disability-adjusted life year
DHS	Demographic and health survey
EIR	Entomological inoculation rate
ELISA	Enzyme-linked immunosorbent assay
GIS	Geographical information system
HBI	Human blood index
IEC	Information, education and communication
IPT	Intermittent preventive treatment
IRS	Indoor residual spraying
ITN	Insecticide-treated mosquito nets
IVC	Integrated vector control
KAP	Knowledge, attitudes and practices
LLIN	Long-lasting insecticidal nets
MDA	Mass-drug administration
MICS	Multiple indicator cluster survey
MIS	Malaria indicator survey
NGO	nongovernmental organization
