GUIDELINES

FOR LABORATORY AND FIELD-TESTING OF LONG-LASTING INSECTICIDAL NETS

Guidelines for laboratory and field-testing of long-lasting insecticidal nets

WHO Library Cataloguing-in-Publication Data

Guidelines for laboratory and field testing of long-lasting insecticidal nets.

1. Insecticides – administration and dosage. 2. Mosquito control - methods.
3. Bedding and linens. 4. Clinical trials, Phase II. 5. Clinical trials, Phase III. 6. Guideline.
I. World Health Organization. II. WHO Pesticide Evaluation Scheme.

ISBN 978 92 4 150527 7

(NLM classification: QX 600)

Requests for permission to reproduce or translate WHO publications –whether for sale or for non-commercial distribution– should be addressed to WHO Press through the WHO web site (www.who.int/about/licensing/copyright_form/en/index.html).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

Contents

	Page
Acknowledgements	vii
1. Introduction	1
2.Laboratory testing (phase I)	3
2.1 Regeneration time and wash-resistance	4
2.1.1.Preparation of nets for testing	4
2.1.2 Regeneration time	5
2.1.3 Wash-resistance	6
2.1.4 Washing procedure	8
2.2 Efficacy	8
2.2.1 WHO cone bioassays	8
2.2.2 Tunnel tests	10
2.2.3 Chemical analysis	13
2.3 Efficacy criteria for phase I studies	13
3.Small-scale field trials (phase II)	14
3.1 Design of experimental huts	15
3.1.1 West African-style huts	16
3.1.2 East African-style huts	17
3.1.3 Asian-style huts	18
3.2 Study arms	19
3.3 Preparation of nets	19
3.4 Latin square rotation of treatments, nets and sleepers	22
3.5 Experimental procedures	24
3.6 Outcome measures	25
3.7 Statistical analysis	26
3.8 Perceived adverse effects	26
3.9 Chemical analysis	27
3.10 Ethical considerations	27
3.11 Efficacy criteria for phase II studies	28

4. Large-scale field trials (phase III)	28
4.1 General principles and site selection	28
4.2 Community sensitization and informed consent	29
4.3 Baseline census	29
4.4 Study design	30
4.4.1 Monitoring attrition and fabric integrity	31
4.4.2 Assessment of net insecticidal activity	32
4.5 Allocation of nets	34
4.6 Follow-up surveys	35
4.6.1 Monitoring attrition and fabric integrity	35
4.6.2 Sampling of nets for insecticidal activity	37
4.7 Outcome measures	37
4.7.1 Net attrition	37
4.7.2 Fabric integrity	38
4.7.3 Insecticidal activity	41
4.7.4 Chemical analysis	41
4.8 Ethical considerations	42
4.9 Efficacy criteria for phase III studies	42
5. Adaptations for long-lasting nets with novel insecticides, synergists and insecticide mixtures	42
5.1 Characterization of insecticide resistance	43
5.2 Efficacy testing of nets with insecticides other than pyrethroids	44
5.3 Efficacy testing of nets with a mixture of Insecticides	45
5.4 Efficacy testing of combination nets	48
Annex 1. Informed consent form for sleepers in experimental hut studies (template)	49
Annex 2. Informed consent form for net users in phase III studies (template)	55
Annex 3. Washing procedure devised by the Collaborative International Pesticides Analytical Council (CIPAC)	61

Annex 4.	Cone bioassay of nets collected in households	63
Annex 5.	Tunnel bioassay of nets collected in households	64
Annex 6.	Sample table for bioassays in phase II experimental hut trials	65
Annex 7.	Sample table for experimental hut data	66
Annex 8.	Household census and demographic data form	67
Annex 9.	Net master list	68
Annex 10.	Assessment of adverse effects among net users	69
Annex 11.	Sample questionnaire for monitoring durability of nets in phase III studies	71
Annex 12.	Sample table for fabric integrity measured in phase III studies	87
Annex 13.	Sample table for biological efficacy in phase III studies	88
Annex 14.	Sample table for data on chemical content of nets in phase III studies	89

These guidelines were finalized by experts appointed by the World Health Organization (WHO): Dr Rajendra Bhatt, National Institute of Malaria Research, Raipur, India; Dr Vincent Corbel, Kasetsart University, Bangkok, Thailand; Dr John Gimnig, Centers for Disease Control and Prevention, Atlanta, Georgia, USA; Dr Michael Macdonald, Global Malaria Programme, WHO, Geneva, Switzerland; Dr Kamaraju Raghavendra, National Institute of Malaria Research, Delhi, India; Dr Mark Rowland, London School of Hygiene and Tropical Medicine, London, United Kingdom; Dr Rajpal Yadav, Vector Ecology and Management, Control of Neglected Tropical Diseases, WHO, Geneva, Switzerland; and Dr Morteza Zaim, Vector Ecology and Management, Control of Neglected Tropical Diseases, WHO, Geneva, Switzerland.

The WHO Department of Control of Neglected Tropical Diseases acknowledges all the individuals and institutions listed above for their important contributions to this work. The financial support provided by the Bill & Melinda Gates Foundation is also gratefully acknowledged.

The Department would greatly appreciate receiving feedback and suggestions from national programmes, research institutions and industry on the guidelines in order to improve future editions.
