

# Research Priorities for Chagas Disease, Human African Trypanosomiasis and Leishmaniasis

---

Technical Report of the TDR Disease Reference Group on  
Chagas Disease, Human African Trypanosomiasis and Leishmaniasis

World Health  
Organization

The World Health Organization was established in 1948 as a specialized agency of the United Nations serving as the directing and coordinating authority for international health matters and public health. One of WHO's constitutional functions is to provide objective and reliable information and advice in the field of human health, a responsibility that it fulfils in part through its extensive programme of publications. The Organization seeks through its publications to support national health strategies and address the most pressing public health concerns of populations around the world. To respond to the needs of Member States at all levels of development, WHO publishes practical manuals, handbooks and training material for specific categories of health workers; internationally applicable guidelines and standards; reviews and analyses of health policies, programmes and research; and state-of-the-art consensus reports that offer technical advice and recommendations for decision-makers. These books are closely tied to the Organization's priority activities, encompassing disease prevention and control, the development of equitable health systems based on primary health care, and health promotion for individuals and communities. Progress towards better health for all also demands the global dissemination and exchange of information that draws on the knowledge and experience of all WHO's Member Countries and the collaboration of world leaders in public health and the biomedical sciences. To ensure the widest possible availability of authoritative information and guidance on health matters, WHO secures the broad international distribution of its publications and encourages their translation and adaptation. By helping to promote and protect health and prevent and control disease throughout the world, WHO's books contribute to achieving the Organization's principal objective – the attainment by all people of the highest possible level of health.

The WHO Technical Report Series makes available the findings of various international groups of experts that provide WHO with the latest scientific and technical advice on a broad range of medical and public health subjects. Members of such expert groups serve without remuneration in their personal capacities rather than as representatives of governments or other bodies; their views do not necessarily reflect the decisions or the stated policy of WHO. An annual subscription to this series, comprising four to six such reports, costs CHF 150.00/US\$ 180.00 (CHF 105.00/US\$ 126.00 in developing countries). For further information, please contact: WHO Press, World Health Organization, 20 Avenue Appia, 1211 Geneva 27, Switzerland (tel. +41 22 791 3264; fax: +41 22 791 4857; e-mail: [bookorders@who.int](mailto:bookorders@who.int); order on line: <http://www.who.int/bookorders>).

All rights reserved. Publications of the World Health Organization are available on the WHO web site ([www.who.int](http://www.who.int)) or can be purchased from WHO Press, World Health Organization, 20 Avenue Appia, 1211 Geneva 27, Switzerland (tel.: +41 22 791 3264; fax: +41 22 791 4857; e-mail: [bookorders@who.int](mailto:bookorders@who.int)).

Requests for permission to reproduce or translate WHO publications – whether for sale or for noncommercial distribution – should be addressed to WHO Press through the WHO web site ([http://www.who.int/about/licensing/copyright\\_form/en/index.html](http://www.who.int/about/licensing/copyright_form/en/index.html)).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

This publication contains the collective views of an international group of experts and does not necessarily represent the decisions or the policies of the World Health Organization.

# Contents

<b>WHO/TDR Disease Reference Group on Chagas Disease, Human African Trypanosomiasis and Leishmaniasis</b>	v
<b>Abbreviations and acronyms</b>	vii
<b>Executive summary</b>	xi
<b>1. Introduction</b>	1
1.1 Reasons for setting research priorities	4
1.2 TDR stewardship mandate	5
1.3 Goal of this report /strategic objectives	6
1.4 Overview	6
<b>2. Methodology and prioritization</b>	9
2.1 Authoritative evidence review to define thematic areas	9
2.2 Stakeholders' consultation and second round of criteria-based ranking	9
2.3 Final round of ranking	10
<b>3. Epidemiology and burden of disease</b>	11
3.1 Chagas disease	11
3.2 Human African trypanosomiasis	14
3.3 Leishmaniasis	17
<b>4. Clinical forms, pathogenesis and HIV coinfection</b>	21
4.1 Chagas disease	21
4.1.1 Clinical presentations	21
4.1.2 Chagas heart disease	21
4.1.3 Gastrointestinal manifestations	23
4.1.4 Congenital Chagas disease	23
4.1.5 Chagas disease and HIV coinfection	23
4.2 Human African trypanosomiasis	24
4.2.1 Pathogenesis	24
4.2.2 Clinical presentation	24
4.3 Leishmaniasis	26
4.3.1 Clinical presentations	26
<b>5. Diagnosis</b>	31
5.1 Chagas disease	31
5.1.1 Parasitological diagnosis	31
5.1.2 Serology	31
5.1.3 Quantitative and qualitative detection of parasite DNA	31
5.1.4 Diagnosis in newborns	34
5.1.5 Diagnosis of therapy efficacy and cure	34
5.1.6 Diagnosis of drug resistant Chagas disease	35
5.2 Human African trypanosomiasis	35
5.2.1 Demonstration of parasite	35
5.2.2 Serology	35
5.2.3 Quantitative and qualitative detection of parasite DNA	38
5.2.4 Staging of the disease	38

5.3	Leishmaniasis	38
5.3.1	Parasitological diagnosis	38
5.3.2	Serology	40
5.3.3	Detection of parasite products	41
5.3.4	Quantitative and qualitative detection of parasite DNA	41
<b>6.</b>	<b>Drugs and drug resistance</b>	<b>43</b>
6.1	Current treatment and development of new drugs	47
6.1.1	Chagas disease	47
6.1.2	Human African trypanosomiasis	49
6.1.3	Leishmaniasis	50
<b>7.</b>	<b>Vaccines against Chagas disease, human African trypanosomiasis and leishmaniasis</b>	<b>55</b>
7.1	Overview	55
7.2	Chagas disease	55
7.3	Human African trypanosomiasis	58
7.4	Leishmaniasis	59
<b>8.</b>	<b>Vector control</b>	<b>63</b>
8.1	Chagas disease: triatomine bug control	63
8.2	Human African trypanosomiasis: tsetse fly control	64
8.2.1	Tsetse species of highest priority	65
8.2.2	Control activities at all levels	66
8.2.3	Costs of vector control	67
8.3	Leishmaniasis: sandfly control	67
8.3.1	Source reduction	67
8.3.2	Targeting sugar-feeding adult sandflies	72
8.3.3	Extermination of sandflies feeding on domestic animals	72
8.3.4	Flight barriers for preventing sandflies from reaching houses	73
8.3.5	Protection of homes – indoor residual insecticide spraying	74
8.3.6	Protection of rooms/porches – insecticide diffusers and coils	74
8.3.7	Personal protection – insecticide-treated nets and repellents	74
8.3.8	Integrated disease-control campaigns	75
<b>9.</b>	<b>Economic evaluation of health-care interventions</b>	<b>77</b>
<b>10.</b>	<b>Research priority recommendations</b>	<b>81</b>
	<b>Acknowledgements</b>	<b>83</b>
	<b>References</b>	<b>85</b>
	<b>Appendices</b>	<b>99</b>

# **WHO/TDR Disease Reference Group on Chagas Disease, Human African Trypanosomiasis and Leishmaniasis (DRG3) 2009–2010**

## **Members**

Professor M. Barrett, University of Glasgow, Glasgow Scotland

Professor M. Boelaert, Institute of Tropical Medicine, Epidemiology and Disease Control Unit, Antwerp, Belgium

Ms M. Castillo-Riquelme, Health Economics Consultant, Ministerio de Salud, Departamento de Economía de la Salud, Ministry of Health, Chile

Professor M.J. Lehane, Liverpool School of Tropical Medicine, Liverpool, England

Professor P. Lutumba, Institut National de Recherche Bio-Médicale, Kinshasa University, Kinshasa, Democratic Republic of Congo

Professor E. Matovu, College of Veterinary Medicine, Animal Resources and Biosecurity, Makerere University, Kampala, Uganda

Professor M.M. Mukhtar, Institute of Endemic Diseases, University of Khartoum, Khartoum, Sudan (*co-Chair*)

Dr D. Sacks, Head, Intracellular Parasite Biology Section, Laboratory of Parasitic Diseases, National Institutes of Health, National Institute of Allergy and Infectious Diseases, Bethesda MD, USA

Professor C. Schofield, Coordinator, Latin American Network for Research on the Biology and Control of Triatominae (ECLAT), Faculty of Infectious and Tropical Diseases, London School of Hygiene and Tropical Medicine, London, England

Dr S.A. Sosa-Estani, Director, National Institute of Parasitology, ANLIS Malbrán, Ministerio de Salud, Argentina

Professor K. Stuart, Founder, Seattle Biomedical Research Institute, Seattle, WA, USA (*Chair*)

Professor S. Sundar, Institute of Medical Sciences, Banaras Hindu University, Varanasi, India

Professor A. Warburg, Faculty of Medicine, Hebrew University, Einkerem, Israel

Professor B. Zingales, Instituto de Química, Universidade de São Paulo, São Paulo, Brazil (*co-Chair*)

## **Career Development Fellow**

Dr S. Bakhiet, Institute of Endemic Diseases, University of Khartoum, Sudan

## **Secretariat**

Dr D. Kioy, Special Programme for Research and Training in Tropical Diseases, World Health Organization, Geneva, Switzerland (*Secretary*)

Dr A.M.J Oduola, Coordinator, Special Programme for Research and Training in Tropical Diseases, World Health Organization, Geneva, Switzerland

Dr Michael Wilson, Scientist, Special Programme for Research and Training in Tropical Diseases, WHO, Geneva, Switzerland
