

WHO EXPERT COMMITTEE ON DRUG DEPENDENCE

Thirty-fourth Report

World Health
Organization

The World Health Organization was established in 1948 as a specialized agency of the United Nations serving as the directing and coordinating authority for international health matters and public health. One of WHO's constitutional functions is to provide objective and reliable information and advice in the field of human health, a responsibility that it fulfils in part through its extensive programme of publications.

The Organization seeks through its publications to support national health strategies and address the most pressing public health concerns of populations around the world. To respond to the needs of Member States at all levels of development, WHO publishes practical manuals, handbooks and training material for specific categories of health workers; internationally applicable guidelines and standards; reviews and analyses of health policies, programmes and research; and state-of-the-art consensus reports that offer technical advice and recommendations for decision-makers. These books are closely tied to the Organization's priority activities, encompassing disease prevention and control, the development of equitable health systems based on primary health care, and health promotion for individuals and communities. Progress towards better health for all also demands the global dissemination and exchange of information that draws on the knowledge and experience of all WHO's Member countries and the collaboration of world leaders in public health and the biomedical sciences.

To ensure the widest possible availability of authoritative information and guidance on health matters, WHO secures the broad international distribution of its publications and encourages their translation and adaptation. By helping to promote and protect health and prevent and control disease throughout the world, WHO's books contribute to achieving the Organization's principal objective — the attainment by all people of the highest possible level of health.

The WHO Technical Report Series makes available the findings of various international groups of experts that provide WHO with the latest scientific and technical advice on a broad range of medical and public health subjects. Members of such expert groups serve without remuneration in their personal capacities rather than as representatives of governments or other bodies; their views do not necessarily reflect the decisions or the stated policy of WHO. An annual subscription to this series, comprising about six such reports, costs CHF 168.00/US\$ 151.00 (CHF 128.40/US\$ 115.00 in developing countries). For further information, please contact: WHO Press, World Health Organization, 20 avenue Appia, 1211 Geneva 27, Switzerland (tel. +41 22 791 3264; fax: +41 22 791 4857; e-mail: bookorders@who.int; order on line: <http://www.who.int/bookorders>).

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the World Health Organization

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

This publication contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the World Health Organization.

Contents

1. Introduction	1
2. Critical review of psychoactive substances	1
2.1 Substances recommended for changes in scheduling	2
2.1.1 Dronabinol (INN)	2
2.1.2 Oripavine	4
2.2 Other substances critically reviewed	5
2.2.1 Buprenorphine (INN)	5
2.2.2 Butorphanol (INN)	8
2.2.3 Ketamine (INN)	9
2.2.4 Khat (<i>Catha edulis</i> Forsk.)	10
2.2.5 Zopiclone (INN)	12
3. Pre-review of psychoactive substances	13
3.1 Gamma-hydroxybutyric acid	13
3.2 Tramadol (INN)	14
4. Substances identified for future pre-review	15
4.1 Gamma-butyrolactone (GBL)	15
4.2 1,4-Butanediol	16
5. Guidelines for the WHO review of dependence-producing psychoactive substances for international control	16
5.1 Amending the current version of the guidelines	16
5.2 Interpretation of specific aspects of the guidelines	17
5.3 Access to information necessary for the evaluation of substances	18
6. Other matters	18
6.1 Activities of the European Monitoring Centre for Drugs and Drug Addiction (EMCDDA)	18
6.2 Use of pharmacovigilance data for the assessment of dependence and abuse potential (procedures and methodology)	19
6.3 Promotion of education and information on the appropriate use of psychoactive drugs	19
6.4 Impact of international control on medical availability of substances	20
