## **Intersectoral Governance for Health in All Policies**

The European Observatory on Health Systems and Policies supports and promotes evidence-based health policy-making through comprehensive and rigorous analysis of health systems in Europe. It brings together a wide range of policy-makers, academics and practitioners to analyse trends in health reform, drawing on experience from across Europe to illuminate policy issues.

The European Observatory on Health Systems and Policies is a partnership between the World Health Organization Regional Office for Europe, the Governments of Belgium, Finland, Ireland, the Netherlands, Norway, Slovenia, Spain, Sweden and the Veneto Region of Italy, the European Commission, the European Investment Bank, the World Bank, UNCAM (French National Union of Health Insurance Funds), the London School of Economics and Political Science, and the London School of Hygiene & Tropical Medicine.

# Foreword

Since the arrival of the new millennium, the field of health promotion has added many emerging areas related to health to its field of interest and action.

Many of these areas were, of course, anticipated in the Ottawa Charter on Health Promotion; nonetheless there has been an explosion of interest in three critical areas in recent years, namely on the social determinants of health, governance, and Health in All Policies, and more specifically “the translation of Health in All Policies from a policy principle into a policy practice”. Now we have a new and significant book that addresses these three areas in a most exciting way.

The International Union for Health Promotion and Education (IUHPE) acknowledges that many of the solutions to the most pressing health issues reside outside the health sector. It is therefore imperative to facilitate governance practices that enable improved work across sectors in government, the nongovernment sector, academic institutions and the private sector, at all territorial levels.

During the course of many discussions among health promoters it became clear that we lacked a solid understanding of the mechanisms that made possible the development of Health in All Policies. We knew that some European countries
