Acknowledgements.....	vii
Acronyms	xii
Executive summary	xiii
PART I BACKGROUND.....	1
1 Introduction	3
1.1 Overview	3
1.1.1 Issues in phlebotomy	3
1.1.2 The need for guidelines	4
1.1.3 Definitions.....	4
1.2 Purpose and scope	5
1.3 Objectives.....	5
1.4 Target audience	5
1.5 Indications for blood sampling and blood collection.....	5
1.6 Structure of document	6
PART II ASPECTS OF PHLEBOTOMY	7
2 Best practices in phlebotomy	9
2.1 Background information on best practices in phlebotomy	9
2.1.1 Planning ahead	9
2.1.2 Using an appropriate location.....	9
2.1.3 Quality control	9
2.1.4 Quality care for patients and health workers.....	10
2.1.5 Quality of laboratory sampling	11
2.2 Practical guidance on best practices in phlebotomy	12
2.2.1 Provision of an appropriate location.....	12
2.2.2 Provision of clear instructions.....	12
2.2.3 Procedure for drawing blood	12
2.3 Illustrations for best practices in phlebotomy	18
3 Blood-sampling systems	21
3.1 Background information on blood-sampling systems	21
3.1.1 Closed systems.....	21
3.1.2 Open systems.....	22
3.2 Practical guidance on blood-sampling systems	22
3.2.1 Needle and syringe	22
3.2.2 Choice of gauge	22
3.3 Illustrations for blood-sampling systems	23
4 Venepuncture for blood donation	25
4.1 Background information on venepuncture for blood donation	25
4.1.1 Minimum requirements for venepuncture for blood donation	25
4.1.2 Before a blood donation	26
4.2 Practical guidance on venepuncture for blood donation	27
4.2.1 Collecting blood	27
4.2.2 After a blood donation	28
4.2.3 Adverse events in blood donation	29
5 Arterial blood sampling	31
5.1 Background information on arterial blood sampling	31
5.1.1 Choice of site.....	31
5.1.2 Complications related to arterial blood sampling.....	31
5.1.3 Sampling errors.....	32
5.2 Practical guidance on arterial blood sampling.....	32
5.2.1 Equipment and supplies.....	32
5.2.2 Procedure for arterial blood sampling using radial artery	32
5.3 Illustrations for arterial blood sampling	33

6 Paediatric and neonatal blood sampling.....	35
6.1 Background information on paediatric and neonatal blood sampling	35
6.1.1 Choice of procedure and site	35
6.2 Practical guidance on paediatric and neonatal blood sampling	35
6.2.1 Patient identification	35
6.2.2 Venepuncture	36
6.2.3 Finger and heel-prick	37
6.3 Illustrations for paediatric and neonatal blood sampling.....	37
7 Capillary sampling.....	41
7.1 Background information on capillary sampling	41
7.1.1 Choice of site	41
7.1.2 Selecting the length of lancet	42
7.1.3 Order of draw.....	42
7.1.4 Complications	42
7.2 Practical guidance on capillary sampling.....	43
7.2.1 Selection of site and lancet.....	43
7.2.2 Procedure for capillary sampling	43
7.3 Illustrations for capillary sampling.....	45
PART III IMPLEMENTATION, EVALUATION AND MONITORING	47
8 Implementing best phlebotomy practices.....	49
8.1 Setting policies and standard operating procedures	49
8.2 Procurement.....	49
8.2.1 Blood-sampling equipment.....	50
8.2.2 Protection	50
8.3 Phlebotomy training.....	51
8.4 Safe waste and sharps disposal	51
8.5 Prevention and management of incidents and adverse events.....	52
8.5.1 Patient related	52
8.5.2 Health-worker related.....	53
8.5.3 Risk assessment and risk reduction strategies	54
9 Monitoring and evaluation.....	55
PART IV REFERENCES	57
PART V ANNEXES	63
Annex A: Methods and evidence base.....	65
Annex B: Infection prevention and control, safety equipment and best practice.....	69
Annex C: Devices available for drawing blood	71
Annex D: Managing occupational exposure to hepatitis B, hepatitis C and HIV	73
Annex E: Training course content for phlebotomists	77
Annex F: Explaining the procedure to a patient.....	79
Annex G: Disassembly of needle from syringe or other devices	81
Annex H: Blood spillage	83
Annex I: Modified Allen test	85
Annex J: Cochrane review	87
Annex references	103
Glossary	105

Tables

Table 2.1 Elements of quality assurance in phlebotomy	10
Table 2.2 Infection prevention and control practices	12
Table 2.3 Recommended order of draw for plastic vacuum tubes	16
Table 3.1 Recommended needle gauge, length and device for routine injection and phlebotomy procedures for different age groups	22
Table 4.1 Adverse events in blood donation	29
Table 7.1 Conditions influencing the choice of heel or finger-prick	41
Table 8.1 Summary of risks and risk-reduction strategies	54
Table B.1 Recommendations for infection prevention and control, safety equipment and best practice	69
Table C.1 Devices for drawing blood.....	71
Table D.1 Recommendations for HBV post-exposure prophylaxis, according to immune status	74
Table D.2 Recommended two and three-drug post-exposure prophylaxis regimens	75

Acknowledgements

The World Health Organization (WHO) Injection Safety and Related Infection Control programme and the Safe Injection Global Network (SIGN) Secretariat in the WHO Department of Essential Health Technologies (EHT) wish to express their thanks to the people listed below for their contribution to the development of these phlebotomy guidelines. The authors and reviewers are experts in the field of injection safety and related infection control. Particular thanks go to Shaheen Mehtar of Stellenbosch University, South Africa, who prepared background documents for the consultation, and wrote the initial and final drafts.

Development of this publication was supported by Cooperative Agreement CDC-RFA-CI09-903 from:

- the Department of Health and Human Services/Centers for Disease Control and Prevention (CDC), Atlanta, United States of America (USA);
- the National Center for HIV, Viral Hepatitis, STD, and TB Prevention, Global AIDS Program (GAP).

Technical authors and main reviewers

Internal authors and reviewers (WHO)

Dr Neelam Dhingra

Coordinator

Blood Transfusion Safety (BTS)

WHO Headquarters (WHO/HQ), Health Systems and Services, Department of Essential Health Technologies (HSS/EHT)

Dr Micheline Diepart

Antiretroviral Treatment and HIV Care

WHO/HQ, Department of HIV/AIDS (WHO/HQ/HTM/HIV)

Dr Gerald Dziekan

Program Manager

WHO Patient Safety Program (PSP)

WHO/HQ, Department of Information, Evidence and Research (IER)

Dr Selma Khamassi, MD, MSc

Injection Safety and Related Infection Control

SIGN Secretariat

WHO/HQ/HSS/EHT/Diagnostic Imaging and Medical Devices (DIM)

Dr Fernando Otaiza, MD, MSc, Infection Prevention and Control in Health Care

Biorisk Reduction for Dangerous Pathogens

WHO Department of Epidemic and Pandemic Alert and Response

Mrs Susan Wilburn

WHO, Department of Occupational and Environmental Health (OEH)

External authors and reviewers

Dr Rana Al-Abdulrazzak

Head of Donation Department & Hospital Liaison Department
Kuwait Central Blood Bank
Kuwait

Ms Patricia K Bertsche

Manager, Global Occupational Health Services
Abbott Laboratories
USA

Dr Nizam Damani

International Federation of Infection Control
Northern Ireland

Dr Che-Kit Lin

Hospital Chief Executive
Hong Kong Red Cross Blood Transfusion Service
Hong Kong

Dr Lawrence Marum

Team Leader Medical Transmission
Global AIDS Program, HIV Prevention Branch
CDC, Atlanta, USA

Professor Shaheen Mehtar

Head of Academic Unit for Infection Prevention and Control
Tygerberg Hospital and Stellenbosch University, Cape Town
South Africa

Dr Joseph Perz

Acting Team Leader, Research and Field Investigations
Epidemiology and Surveillance Branch
Division of Healthcare Quality Promotion (DHQP)
CDC, Atlanta, USA

Dr Ruby Pietersz

Manager of Department of Research and Education
Plesmanlaan 125, 1066 CX
Amsterdam
