

Risk assessment of *Campylobacter* spp. in broiler chickens

INTERPRETATIVE SUMMARY

The designations employed and the presentation of material in this information product do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations (FAO) or of the World Health Organization (WHO) concerning the legal or development status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. The views expressed herein are those of the authors and do not necessarily represent those of FAO nor of WHO nor of their affiliated organization(s). All reasonable precautions have been taken by FAO and WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall FAO or WHO be liable for damages arising from its use.

RISK ASSESSMENT OF *CAMPYLOBACTER* SPP. IN BROILER CHICKENS

INTERPRETATIVE SUMMARY

WORLD HEALTH ORGANIZATION
FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

2009

The designations employed and the presentation of material in this information product do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations or of the World Health Organization concerning the legal or development status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. The mention of specific companies or products of manufacturers, whether or not these have been patented, does not imply that these have been endorsed or recommended by FAO or WHO in preference to others of a similar nature that are not mentioned. All reasonable precautions have been taken by the World Health Organization and the Food and Agriculture Organization of the United Nations to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization or the Food and Agriculture Organization of the United Nations be liable for damages arising from its use. This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of FAO or of WHO.

CONTENTS

Acknowledgements	v
Risk assessment of <i>Campylobacter</i> spp. in broiler chickens drafting group	vii
Reviewers	ix
Foreword	xi
Preface	xiii
Abbreviations	xv
1. INTRODUCTION	1
2. SCOPE OF THE RISK ASSESSMENT	3
3. HAZARD IDENTIFICATION	5
3.1 Human incidence of <i>Campylobacter</i> illness	5
3.2 Sources of illness and risk factors	5
3.3 Characteristics of the organism	7
4. RISK ASSESSMENT MODEL OVERVIEW	9
4.1 Exposure assessment	9
4.2 Hazard Characterization	11
4.3 Risk Characterization	12
5. SCENARIO ANALYSIS	17
5.1 Scenario 1: Change in the prevalence of contamination of chickens at the retail stage	17
5.2 Scenario 2: Change in the level of contamination	19
5.3 Scenario 3: Changing between-flock and within-flock prevalence	21
5.4 Scenario 4: Changing internal and surface contamination levels before and through processing	23
5.5 Scenario 5: Risk mitigation impacts from freezing or fresh chicken.	24
6. SUMMARY AND KEY FINDINGS	27
6.1 Model Use and Adaptation	27
6.2 Key findings	28
7. REFERENCES	31
