Foreword	vii
Introduction	1
Investigation of a yellow fever epidemic: procedure	5
Instructions	6
Summary of the stages	6
Stage 1: Checking information	7
Objectives	7
A. Is it a suspected case of yellow fever?	7
B. Has the person been vaccinated against yellow fever, and if so when?	7
C. Has(have) the case (or cases) been confirmed by a laboratory?	8
D. Where was the case infected?	8
Key messages	10
Bibliography	10
Stage 2: Preparing the investigation	11
Objectives	11
A. Form a team	11
B. Obtain permits	14
C. Gather additional information	14
D. Prepare the necessary equipment for the investigation	15
E. Estimate the required budget for the investigation	15
F. Contact the national laboratory	15
G. Determine the methods of communication	15
Key messages	16
Bibliography	16
Stage 3: Field investigation	17
Objectives	17
The key questions which the investigation must answer.	17
A. Describe the situation among the population	18
B. Describe the mode of transmission: Identify the vectors implicated in transmission	24
C. Evaluate the risks of the disease spreading	27
Key messages	28
Bibliography	28
Stage 4: Preparing the response	29
Objectives	29
A. Disseminate information	29
B. Define the response strategy	30
C. What's to be done after the investigation and the response?	33
Key messages	34
Bibliography	34

Ready reference cards	35
Ready reference card n°1 – Table of yellow fever signs and symptoms	36
Ready reference card n°2 – Laboratory tests to confirm the diagnosis of yellow fever	37
Ready reference card n°3 – Alert form: suspected yellow fever	38
Ready reference card n°4 – Form for transmittal to the laboratory for definitive case classification	39
Ready reference card n°5 – Differential diagnosis of haemorrhagic fevers and jaundice	40
Ready reference card n°6 – List of notification centres	42
Ready reference card n°7 – List of details of managers at district and country levels	43
Ready reference card n°8 – Check list of equipment needed in the laboratory to confirm diagnosis of yellow fever	44
Ready reference card n°9 – Safety procedure for packing and transporting specimens	45
Ready reference card n°10 – Terms of reference of the investigation team	46
Ready reference card n°11 – Role of the different echelons of the health system in yellow fever surveillance and support for the laboratory	47
Ready reference card n°12 – Role of the different levels of the health system in yellow-fever prevention	48
Ready reference card n°13 – Check List of administrative, financial and logistic components of the investigation	49
Ready reference card n°14 – Analysis of epidemiological data in terms of time, place and person (TPP)	50
Ready reference card n°15 – Evaluation of yellow-fever vaccination coverage	50
Ready reference card n°16 – Yellow fever epidemic curve	51
Ready reference card n°17 – Control measures in case of confirmed yellow-fever epidemic	51
Ready reference card n°18 – Africa vertebrate hosts of yellow fever	52
Ready reference card n°19 – Monitoring and rapid assessment form: yellow fever supplementary immunization activity	53
Ready reference card n°20 – Risk of yellow fever spreading	54
Ready reference card n°21 – Form for target populations for vaccination	55
Ready reference card n°22 – Suspected yellow-fever cases: summary form	56
Ready reference card n°23 – Outline for a written report on an investigation of a yellow-fever epidemic	57

Ready reference card n°24 – Outline for an oral presentation of the investigation report and visual aids	59
Ready reference card n°25 – Technical note: the different types of response strategy	60
Ready reference card n°26 – Injection safety: summary of the WHO/UNICEF declaration of principles	61
Ready reference card n°27 – Community health education messages	62
Annexes	63
Annex n°1 – Clinical diagnosis of yellow fever	64
Annex n°2 – Differential diagnosis of yellow fever	65
Annex n°3 – Laboratory confirmation of yellow fever diagnosis	66
Annex n°4 – Yellow fever vaccine and vaccination against yellow fever	68
Annex n°5 – Areas endemic for yellow fever	69
Annex n°6 – Principal epidemiological patterns of yellow fever in Africa	70
Annex n°7 – Equipment needed to investigate a yellow fever epidemic	71
Annex n°8 – Epidemiological and clinical data	72
Annex n°9 – Comparison of definitions of suspected cases depending on whether the context is one of alert or investigation	72
Annex n°10 – Method used in epidemiological investigation	73
Annex n°11 – Collection, packing and transport of human specimens	74
Annex n°12 – Practical example for calculating rates	75
Annex n°13 – Collection of immature vectors	76
Annex n°14 – Calculating stegomyia indices	77

Acknowledgements

WHO would like to thank for their support GAVI, UNICEF and all those who have contributed to preparing, drafting and revising this document *Investigation of Yellow Fever Epidemics in Africa: a Field Guide*:

Institut Pasteur, Dakar

Laurence Marrama
Amadou Sall
Diène Sarr

WHO/HQ

Sylvie Briand
Sergio Yactayo
William Perea

Agence de Médecine Préventive

Dorothy Leab

The ERI (Epidemic Readiness and Intervention, WHO) team, and in particular Sergio Yactayo who coordinated the production of this field guide, which was prepared and written by Laurence Marrama, Amadou Sall and Diène Sarr. Sylvie Briand made a valuable contribution to revising it, and Dorothy Leab provided advice on educational aspects of the layout.
