Introduction	1
Adapting these guidelines to meet local needs	2
Coordination with Ministry of Health Guidelines	2
Module 1: Triage and emergency management	4
Chapter 1: Triage and emergency assessment	5
Chapter 2: Management of emergency signs	11
Module 2: Integrated management of childhood illness in emergencies	13
Flowchart: Summary of the integrated case management process	14
Chapter 3: Diarrhoea and dehydration	15
Flowchart: Assessment of the child with diarrhoea	15
Chapter 4: Cough or difficult breathing	22
Flowchart: Assessment of the child with cough or difficult breathing	22
Chapter 5: Fever	28
Flowchart: Assessment of the child with malaria	29
Flowchart: Assessment of the child with measles	38
Flowchart: Assessment of the child with severe febrile diseases	41
Chapter 6: Malnutrition	44
Flowchart: Assessment of the child for malnutrition	44
Chapter 7: Pallor/anaemia	49
Flowchart: Assessment of the child with anaemia	49
Chapter 8: Newborn and young infant up to 2 months	52
Flowchart: Newborn assessment and resuscitation	52
Flowchart: Immediate care of the newborn	53
Flowchart: Early care of the newborn	54
Flowchart: Assessment of the infant up to 2 months of age	55
Chapter 9: HIV/AIDS	58
Chapter 10: Injuries	60
Flowchart: Assessment of the injured child	60
Flowchart: Examination of the injured child	61
Chapter 11: Burns	63
Flowchart: Assessment of the child with burns	63
Chapter 12: Poisoning	67

Module 3: Prevention of child morbidity and mortality	70
Chapter 13: Immunization and other public health measures	71
Chapter 14: Prevention of HIV infection in children	75
Chapter 15: Mental health and psychosocial support	79
 Annex 1: Glossary	 82
 Annex 2: Weight-for-height chart	 84
 Annex 3: Chapter resources	 86
 Annex 4: Drug dosages for children (Formulary)	 94

Acknowledgments

Edited by Dr Lulu Muhe (WHO/CAH), Dr Michelle Gayer (WHO/DCE) and Dr William Moss (JHU).

This manual was drafted for the World Health Organization by the Centre for Refugee and Disaster Response, Bloomberg School of Public Health, Johns Hopkins University, led by Dr William Moss, and with key contributions from Dr. Meenakshi Ramakrishan and Michelle Barnhart (JHU).

Key contributions were made by Susanne Gelders, consultant, André Briend (WHO/CAH), Meena Cabral De Mello (WHO/CAH) and Frits de Haan Reijnsenbach (WHO/CAH).

The following people contributed to the review and revision of one or more chapters or review of the whole document and their input is gratefully acknowledged:

Samira Aboubaker (WHO/CAH), Fayez Ahmad (Merlin), Rajiv Bahl (WHO/CAH), Elisabeth Berryman (SCF-UK), Tarun Dua (WHO/ NMH), Nada Al Ward (WHO/HAC), Micheline Diepart (WHO/HIV), Olivier Fontaine (WHO/CAH), Chantal Gegout (WHO/NHD), Peggy Henderson (WHO/CAH), José Martines (WHO/CAH), Elizabeth Mason (WHO/CAH), David Meddings (WHO/VIP), Zinga José Nkuni (WHO/GMP), Peter Olumese (WHO/GMP), Shamim Qazi (WHO/CAH), Agostino Paganini (UNICEF), William Perea (WHO/EPR), Aafje Rietveld (WHO/GMP), Peter Strebel (WHO/EPI), Jim Tulloch (AusAid), Mark Van Ommeren (WHO/NMH), Martin Weber (WHO/CAH), Zita C. Weise Prinzo (WHO/NHD).

This document was partially funded by OFDA, and their support is gratefully acknowledged.

Review of manual

This manual will be reviewed in 3 years i.e. by 2011. The use of the manual during this interim period will be closely monitored through partners and NGO's who will be responsible for directly implementing it. The experience will be used to improve the revised version.

Introduction

These guidelines are to assist in the care of children in emergencies. They are designed to serve as a reference manual for the evaluation and management of children in emergencies, and as the basis for the training of health care workers. The target audience is first level health workers who provide care to children under the age of 5 years. Physicians and health care workers with more advanced training are referred to the WHO Pocket Book of Hospital Care for Children: Guidelines for the Management of Common Illnesses with Limited Resources (2005).

These guidelines focus on care provided during the acute and chronic phases of an emergency. The acute phase of an emergency is defined by crude mortality rate and persists as long as the crude mortality rate is at least double the baseline mortality rate. This means as long as there are twice as many people dying per day compared to the normal rate of death. In sub-Saharan Africa, this threshold is set at one death per 10 000 persons per day.

These guidelines are designed for the care of children where no inpatient hospital facilities are available. It assumes that some injectable (intramuscular) and intravenous medicines can be given. If referral or hospital facilities are available, some of the treatment options in these guidelines may not be applicable and the child with severe illness is best referred to hospital.

These guidelines are designed to reduce child morbidity and mortality by addressing the major causes of child morbidity and mortality in emergencies. These causes are:

- diarrhoeal diseases
- acute respiratory tract infections
- measles
- malaria
- severe bacterial infections
- malnutrition and micronutrient deficiencies
- injuries
- burns
- poisoning.
