Publications of the World Health Organization can be obtained from WHO Press, World Health Organization, 20 Avenue Appia, 1211 Geneva 27, Switzerland (tel: +41 22 791 2476; fax: +41 22 791 4857; email: bookorders@who.int). Requests for permission to reproduce or translate WHO publications – whether for sale or for noncommercial distribution – should be addressed to WHO Press, at the above address (fax: +41 22 791 4806; email: permissions@who.int).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either express or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

The named authors alone are responsible for the views expressed in this publication.

1 SUMMARY AND RECOMMENDATIONS FOR FURTHER STUDIES.....	1
1.1 Summary.....	1
1.1.1 Natural and Human-made sources.....	1
1.1.2 Interaction Mechanisms.....	2
1.1.3 In vitro studies.....	4
1.1.4 Animal studies.....	5
1.1.5 Laboratory studies on humans.....	6
1.1.6 Epidemiological studies.....	7
1.1.7 Health risk assessment.....	8
1.1.8 Recommendations for national authorities.....	9
1.2 Recommendations for further study.....	11
1.2.1 Static electric fields.....	11
1.2.2 Static magnetic fields.....	11
1.2.2.1 Theoretical and computational studies.....	11
1.2.2.2 In vitro studies.....	12
1.2.2.3 Animal experimental studies.....	13
1.2.2.4 Human experimental studies.....	14
1.2.2.5 Epidemiological studies.....	14
2 PHYSICAL CHARACTERISTICS.....	17
2.1 Quantities and Units.....	17
3 NATURAL BACKGROUND AND HUMAN-MADE SOURCES AND EXPOSURE.....	19
3.1 Natural Electric and Magnetic Fields.....	19
3.1.1 Natural electric fields.....	19
3.1.2 Natural magnetic fields.....	19
3.2 Human-made fields.....	20
3.2.1 Electric fields.....	20
3.2.1.1 Power transmission.....	20
3.2.1.2 Transportation.....	21
3.2.1.3 Other.....	21

3.2.2	Magnetic fields	22
3.2.2.1	Transportation	22
3.2.2.2	Industry	24
3.2.2.3	Magnetic resonance imaging (MRI).....	25
3.2.2.4	Research and energy technologies	26
3.2.2.5	Other.....	28
4	MEASUREMENT OF STATIC ELECTRIC AND MAGNETIC FIELDS	30
4.1	Electric fields	30
4.2	Magnetic fields.....	31
5	INTERACTION MECHANISMS	33
5.1	Electrodynamic interactions	34
5.1.1	Magnetic induction of electric fields and currents	34
5.1.2	Lorentz force	36
5.1.2.1	Flow potentials.....	36
5.1.2.2	A theoretical study of the possible effects of flow potentials on the heart.....	37
5.1.3	Magnetohydrodynamic model	38
5.2	Magnetomechanical interactions	39
5.2.1	Magnetomechanics (torque on magnetic dipole moment).....	40
5.2.2	Magnetophoresis (force on magnetic dipole moment).....	41
5.2.3	Anisotropic diamagnetism	42
5.3	Radical recombination rates.....	43
5.4	Biogenic magnetite	45
5.4.1	Single-domain crystals	45
5.4.2	Superparamagnetic magnetite	46
5.4.3	Other ferromagnetic inclusions	46
5.4.4	Local amplification due to ferromagnetic material	46
5.5	Mechanistic co-factors and other mechanisms.....	46
5.5.1	Light as a co-factor	47
5.5.2	State dependence.....	47
5.6	Constraints on physical detection	47
5.7	Conclusions	48
6	DOSIMETRY.....	49
6.1	Static electric fields	49
6.2	Static magnetic fields.....	49
6.3	Motion induced effects in MRI.....	51
6.3.1	Numerical calculations of the induced fields.....	52
6.4	Personal dosimetry.....	57
6.5	Conclusions	57
7	CELLULAR AND ANIMAL STUDIES	58
7.1	<i>In vitro</i> studies	58
7.1.1	Cell free systems	58
7.1.1.1	Membrane structure.....	58

7.1.1.2	Enzyme activity	59
7.1.1.3	Radical pair chemistry.....	59
7.1.1.4	Crystallization of biologically relevant molecules	60
7.1.2	Magneto-mechanical effects on macromolecules and cells.....	63
7.1.3	Cellular metabolic activity	70
7.1.4	Cell membrane physiology.....	74
7.1.5	Gene expression	81
7.1.6	Cell growth, proliferation and apoptosis	83
7.1.7	Genotoxic effects	94
7.1.8	Conclusions	101
7.2	Static field effects <i>in vivo</i>	103
7.2.1	Static electric fields.....	103
7.2.2	Static magnetic fields.....	104
7.2.2.1	Neurobehavioural studies.....	105
7.2.2.2	Musculoskeletal system	121
7.2.2.3	Circulatory system	127
7.2.2.4	Endocrine system.....	148
7.2.2.5	Reproduction and development	155
7.2.2.6	Genotoxicity and cancer.....	166
7.2.2.7	Other biological endpoints.....	171
7.2.2.8	Conclusions	174
8	HUMAN RESPONSES.....	176
8.1	Laboratory studies.....	176
8.1.1	Static electric fields.....	176
8.1.2	Static magnetic fields.....	178
8.1.2.1	Neurobehavioural studies.....	178
8.1.2.2	Circulatory system	185
8.1.2.3	Body and skin temperature	189
8.1.2.4	Dental exposure	191
8.1.2.5	Therapeutic treatment.....	191
8.1.2.6	Conclusions	192
8.2	Epidemiological studies	193
8.2.1	Cancer	194
8.2.1.1	Welders	194
8.2.1.2	Aluminium Workers.....	194
8.2.1.3	Chloralkali Plants.....	197
8.2.2	Haematology, Immune Status and Blood Pressure.....	198
8.2.3	Chromosome Aberrations.....	199
8.2.4	Reproduction	200
8.2.5	Musculoskeletal Symptoms.....	201
8.2.6	Conclusions	202
9	HEALTH RISK ASSESSMENT.....	210
9.1	Static electric field effects.....	210
9.2	Static magnetic field effects.....	210

9.2.1	Physiological responses.....	213
9.2.1.1	Flow potentials and reduced blood flow	213
9.2.1.2	Movement-induced electric potentials and related effects	214
9.2.1.3	Other physiological responses.....	214
9.2.2	Reproduction and development	215
9.2.3	Cancer and genotoxicity.....	215
9.3	Conclusions	216
9.3.1	Chronic and delayed effects.....	216
9.3.2	Acute effects.....	216
10	RECOMMENDATIONS FOR NATIONAL AUTHORITIES...	218
10.1	Exposure guidelines and standards.....	218
10.2	Device standards	218
10.3	Protective measures and ancillary hazards	218
10.4	Ancillary hazards: implantable medical devices	220
10.5	Optimal performance of workers in static magnetic fields	220
10.6	Precautionary measures	221
10.7	Patient exposure to MRI	221

15.2.2.3	Estudios experimentales en animales	345
15.2.2.4	Estudios experimentales en seres humanos	346
15.2.2.5	Estudios epidemiológicos	346
	APPENDIX 1: INTERNATIONAL GUIDELINES ON EXPOSURE TO STATIC MAGNETIC FIELDS	349

NOTE TO READERS OF THE CRITERIA MONOGRAPHS

Every effort has been made to present information in the criteria monographs as accurately as possible without unduly delaying their publication. In the interest of all users of the environmental health criteria monographs, readers are kindly requested to communicate any errors that may have occurred to the Coordinator, Radiation and Environmental Health, World Health Organization, Geneva, Switzerland, in order that they may be included in corrigenda, which will appear in subsequent volumes.
