

Guidelines for drinking-water quality

SECOND EDITION

Volume 3
**Surveillance and control of
community supplies**

World Health Organization
Geneva

The World Health Organization was established in 1948 as a specialized agency of the United Nations serving as the directing and coordinating authority for international health matters and public health. One of WHO's constitutional functions is to provide objective and reliable information and advice in the field of human health, a responsibility that it fulfils in part through its extensive programme of publications.

The Organization seeks through its publications to support national health strategies and address the most pressing public health concerns of populations around the world. To respond to the needs of Member States at all levels of development, WHO publishes practical manuals, handbooks and training material for specific categories of health workers; internationally applicable guidelines and standards, reviews and analyses of health policies, programmes and research, and state-of-the-art consensus reports that offer technical advice and recommendations for decision-makers. These books are closely tied to the Organization's priority activities, encompassing disease prevention and control, the development of equitable health systems based on primary health care, and health promotion for individuals and communities. Progress towards better health for all also demands the global dissemination and exchange of information that draws on the knowledge and experience of all WHO's Member countries and the collaboration of world leaders in public health and biomedical sciences.

To ensure the widest possible availability of authoritative information and guidance on health matters, WHO secures the broad international distribution of its publications and encourages their translation and adaptation. By helping to promote and protect health and prevent and control disease throughout the world, WHO's books contribute to achieving the Organization's principal objective—the attainment by all people of the highest possible level of health.

Guidelines for drinking-water quality

SECOND EDITION

Volume 3 Surveillance and control of community supplies

World Health Organization
Geneva
1997

WHO Library Cataloguing in Publication Data

Guidelines for drinking-water quality —2nd ed

Contents v 3 Surveillance and control of community supplies
1 Drinking water – standards 2 Data collection – methods 3 Guidelines 4 Developing
countries 1 Title Surveillance and control of community supplies
ISBN 92 4 154503 8 (v 3) (NLM Classification WA 657)

The World Health Organization welcomes requests for permission to reproduce or translate its publications, in part or in full. Applications and enquiries should be addressed to the Office of Publications, World Health Organization, Geneva, Switzerland, which will be glad to provide the latest information on any changes made to the text, plans for new editions, and reprints and translations already available.

Contents

Preface	ix
Acknowledgements	xi
Acronyms and abbreviations used in the text	xii
1. Introduction	1
1.1 Scope and purpose	1
1.2 Community water supplies	1
1.3 Health implications	3
1.3.1 Water quality	4
1.3.2 Water-washed diseases	11
1.4 Objectives of surveillance and quality control	11
1.5 Organizational structure	12
1.5.1 The surveillance agency	13
1.5.2 Quality control and the role of the water supplier	13
1.6 Community participation	14
1.7 Role of surveillance in improvement of water supplies	15
2. Planning and implementation of surveillance	17
2.1 Legal and institutional basis	17
2.1.1 Laws, regulations, and standards	17
2.1.2 Institutional framework for water-quality surveillance	18
2.2 Planning	20
2.2.1 General considerations	20
2.2.2 Strategies	22
2.3 Implementation	23
2.3.1 Inventories	23
2.3.2 Designing forms	26
2.3.3 Training	28

2.3.4	Preliminary surveys	30
2.3.5	Undertaking fieldwork	31
2.3.6	Establishing routine surveillance	31
2.3.7	Evaluation	31
2.4	Information management	31
2.4.1	Flow and use of information	31
2.4.2	Information exchange with suppliers	32
2.4.3	Information exchange within the surveillance agency	34
2.4.4	Information exchange with consumers	35
2.4.5	Communication with local and national government	36
2.4.6	Communication linkage between surveillance and remedial action	36
2.4.7	Use of computers	37
2.5	Support structure	38
2.5.1	Laboratory network	38
2.5.2	Transport	39
2.5.3	Financial support	39
2.5.4	Staffing	41
3.	Surveys	42
3.1	Nature and scope of community surveys	42
3.2	Sanitary inspections	44
3.3	Sanitary inspection reports	44
3.3.1	Functions of sanitary inspection report forms	45
3.3.2	Design of sanitary inspection report forms	46
3.4	Carrying out sanitary inspections	47
3.5	Timing and frequency of sanitary inspections	48
3.5.1	New sources	48
3.5.2	Routine surveys of existing supplies	48
4.	Water sampling and analysis	51
4.1	Sampling	52
4.1.1	Location of sampling points	52
4.1.2	Sampling frequency	53
4.1.3	Sampling methods for microbiological analysis	53
4.1.4	Storage of samples for microbiological analysis	53

4.1.5	Sampling methods for physicochemical analysis	56
4.2	Bacteriological analysis	56
4.2.1	Indicator organisms	58
4.2.2	Principal analytical techniques	60
4.2.3	Choice of methods	63
4.2.4	Minimizing the cost of analysis	63
4.2.5	Laboratory-based versus on-site testing	65
4.2.6	Single-application (disposable) test kits	66
4.3	Physicochemical analysis	67
4.3.1	Chlorine residual	67
4.3.2	pH	67
4.3.3	Turbidity	68
4.4	Aesthetic parameters	68
4.4.1	Colour	68
4.4.2	Taste and odour	69
4.5	Other analyses of relevance to health	69
4.6	Analytical quality assurance and quality control	70
4.7	Safety	72
5.	Data analysis and interpretation	73
5.1	Introduction	73
5.2	Results of community surveys	73
5.2.1	Evaluation of water-supply systems	73
5.2.2	Hygiene practices	76
5.3	Assessment of the sanitary situation	76
5.4	Microbiological water quality	77
5.5	Risk assessment	78
5.6	Presentation of information	80
5.6.1	Target audiences	80
5.6.2	Simple data presentation	81
5.7	Use of surveillance findings	82
5.7.1	Use of data at local level	82
5.7.2	Regional use of data	82
5.7.3	Use of data for national planning	83
6.	Technical interventions	84
6.1	Prevention and remedial measures	84
6.2	Protecting water sources	85

6.2.1	Catchment protection	85
6.2.2	Groundwater protection	89
6.3	Wells	92
6.3.1	Dug wells	92
6.3.2	Hand-pumped and mechanically pumped wells	94
6.4	Springs	96
6.5	Rainwater catchment	99
6.6	Water treatment	100
6.6.1	Abstraction	100
6.6.2	Preliminary treatment by storage	102
6.6.3	Plain sedimentation	102
6.6.4	Prefiltration	104
6.6.5	Slow sand filtration	105
6.6.6	Coagulation, flocculation, and sedimentation	107
6.6.7	Rapid sand filtration	110
6.6.8	Aeration	111
6.6.9	Fluoride removal	113
6.6.10	Control of nitrites and nitrates	113
6.6.11	Disinfection	114
6.6.12	Water-treatment plants	115
6.7	Household water treatment and storage	116
6.7.1	Household water treatment	119
6.7.2	Household water storage	125
6.7.3	Storage tanks	127
7.	Hygiene education	129
7.1	Scope of hygiene education	129
7.1.1	Community-based surveillance	129
7.1.2	Hygiene behaviours	130
