Publications of the World Health Organization enjoy copyright protection in accordance with the provisions of Protocol 2 of the Universal Copyright Convention. All rights reserved.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Where the designation "country or area" appears in the headings of tables, it covers countries, territories, cities or areas.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

Contents

1. Introduction	1
2. The basis of the strategy for control of schistosomiasis	2
3. Public health significance of schistosomiasis	2
Strategy of control	4
4. The status of control	4
4.1 Countries without schistosomiasis control	4
4.1.1 Countries with limited peripheral health services	5
4.1.2 Countries with peripheral health services	5
4.2 Countries with limited control activities	6
4.2.1 Countries with local pilot control programmes	6
4.2.2 Countries with national or regional control plans yet to be implemented	6
4.3 Countries with national control programmes	6
5. Selection of control strategies	7
5.1 Priority ranking	8
5.2 Epidemiology	8
5.2.1 General aspects	9
5.2.2 Species-specific aspects	9
5.2.3 Reinfection	10
5.2.4 Natural habitats	10
5.2.5 Man-made lakes	10
5.2.6 Irrigation	11
5.2.7 Small reservoirs	12
5.2.8 Aquaculture and fisheries	12
5.2.9 Urban schistosomiasis	13
5.2.10 Refugees	13
5.3 Situation analysis	13
5.3.1 Global distribution	13
5.3.2 Country distribution	18
5.3.3 Local and national morbidity and mortality	18
6. Adaptation of control approaches to national strategies	19
6.1 Health education, public information and communication	19
6.2 Diagnosis and treatment	21
6.2.1 Hospitals	21
6.2.2 Peripheral health centres with diagnostic facilities	21
6.2.3 Peripheral health units without diagnostic facilities	22
6.2.4 Treatment at the community level	22
6.3 Water supply and sanitation	23
6.4 Snail control	24
6.5 Primary health care	24
6.6 Water resources management	24
6.7 National strategy	25
7. Negotiating strategies for ministries of health	26
7.1 Economic impact of schistosomiasis	26
7.2 Intersectoral development dialogue	26

8. Integration with primary health care services	27
8.1 The role of health services in planning control	27
8.2 The role of health services in implementation and maintenance	28
8.3 Integration with other disease control activities	28
9. Planning and management	29
9.1 Management	29
9.2 Training	30
10. Cost analysis	30
10.1 Estimation of cost	30
10.2 The costs of control	31
10.3 Estimation of effectiveness	32
10.4 The costs of lack of control	32
11. Data management	33
11.1 Monitoring through general health statistics	33
11.2 Outpatient data	33
11.3 Hospital data	33
11.4 Data from control programmes	34
12. Global monitoring	34
12.1 Schistosomiasis database	34
12.2 Geographical information systems	34
13. Policy conclusions	35
13.1 Health and development	35
13.2 Economic policies	37
13.3 Rural development	38
13.4 Urban development	39
Technical issues in control	40
14. Disease and mortality due to schistosomiasis	40
14.1 Morbidity	40
14.1.1 <i>Schistosoma haematobium</i>	41
14.1.2 <i>Schistosoma japonicum</i> and <i>Schistosoma mekongi</i>	42
14.1.3 <i>Schistosoma mansoni</i>	42
14.1.4 <i>Schistosoma intercalatum</i>	43
14.2 Schistosomiasis and cancer	44
14.3 Schistosomiasis and nutrition	45
14.4 Schistosomiasis and intercurrent infections	45
14.4.1 Viral hepatitis	45
14.4.2 Bacterial infections	45
14.4.3 Human immunodeficiency virus (HIV)	46
14.5 Immune response to schistosomiasis	46
14.6 Mortality	47
15. The parasite	48
15.1 Genetics	48
15.2 Taxonomy	48
15.2.1 <i>S. japonicum</i> group	49
15.2.2 <i>S. haematobium</i> group	49
15.2.3 <i>S. mansoni</i> group	49
15.2.4 Hybridization	49
15.3 Snail/parasite relationships	49
15.4 Mammalian reservoirs and schistosomiasis	50

16. The snail	51
16.1 Taxonomy of snail intermediate hosts	51
16.1.1 Snail hosts of the <i>S. japonicum</i> group	51
16.1.2 Snail hosts of <i>S. mansoni</i>	51
16.1.3 Snail hosts of <i>S. haematobium</i>	52
16.2 Ecology of the snail intermediate host	52
16.3 Importation of snails	52
16.4 Control	52
16.4.1 Molluscicides	53
16.4.2 Plant molluscicides	53
16.4.3 Biological control	53
16.4.4 Environmental management	53
17. Water supply and sanitation	54
17.1 Global situation	54
17.2 Country experience	54
18. Diagnostic techniques	55
18.1 Diagnosis in public health	56
18.1.1 Parasitological techniques	56
18.1.2 Immunological methods	57
18.1.3 Other indirect methods	57
18.1.4 Quality control	57
18.2 Diagnosis in hospital patients	57
19. Chemotherapy	58
19.1 Current drugs	58
19.1.1 Praziquantel	58
19.1.2 Metrifonate	59
19.1.3 Oxamniquine	60
19.2 Treatment and retreatment schedules	61
19.3 Effects of chemotherapy	62
19.4 Drug resistance	63
19.5 Treatment of acute schistosomiasis	64
19.6 Interaction with other antiparasitic drugs	64
Progress in control	64
20. Country experience in control	64
20.1 Countries where <i>S. haematobium</i> is endemic	65
20.1.1 Algeria	65
20.1.2 Mauritius	65
20.1.3 Morocco	66
20.1.4 Tunisia	66
20.1.5 United Republic of Tanzania: Zanzibar	67
20.2 Countries where <i>S. mansoni</i> is endemic	67
20.2.1 Brazil	67
20.2.2 Burundi	68
20.2.3 Dominican Republic	69
20.2.4 Suriname	69
20.2.5 Venezuela	69
20.3 Countries where both <i>S. haematobium</i> and <i>S. mansoni</i> are endemic	70
20.3.1 Botswana	70
20.3.2 Egypt	70
20.3.3 Ghana	71

20.3.4. Madagascar	71
20.3.5 Malawi	72
20.3.6 Mali	72
20.3.7 Nigeria	73
20.3.8 Saudi Arabia	73
20.3.9 Sudan	74
20.3.10 Zimbabwe	75
20.4 Countries where <i>S. japonicum</i> is endemic	75
20.4.1 China	75
20.4.2 Indonesia	76
20.4.3 Philippines	76
20.5 Countries where <i>S. mekongi</i> is endemic	77
20.5.1 Lao People's Democratic Republic	77
21. Conclusions	78
22. Recommendations	80
Acknowledgements	81

Indices for use in schistosomiasis control programmes	85

WHO Expert Committee on the Control of Schistosomiasis

Geneva, 8–15 November 1991

Members

- Professor F. Abdel-Wahab, Tropical Medicine Department, Cairo University, Cairo, Egypt
- Dr M. Amin, Health Affairs, Ministry of Health, Gizan Province, Saudi Arabia
- Dr F. Arfaa, Danville, CA, USA
- Dr B. Blas, Schistosomiasis Control and Research Service, Department of Health, Manila, Philippines (*Vice-Chairman*)
- Dr Chen Ming Gang, Institute of Parasitic Diseases, Chinese Academy of Preventive Medicine, Shanghai, China
- Dr T. A. El-Khoby, Director General, Department of Endemic Diseases, Ministry of Health, Cairo, Egypt
- Dr P. Jordan, Ware, Herts., England
- Professor A. B. O. Oyediran, Department of Preventive and Social Medicine, University of Ibadan, Ibadan, Nigeria (*Rapporteur*)
- Dr M. A. S. Porto, National Foundation of Health, Ministry of Health, João Pessoa, Paraíba, Brazil
- Dr L. Rey, Oswaldo Cruz Foundation, Rio de Janeiro, Brazil (*Chairman*)
- Dr B. Sellin, Centre de Recherche sur les Meningites et les Schistosomiasés, Organisation de Coordination et de Coopération pour la Lutte contre les grandes Endémies, Niamey, Niger
- Professor F. Von Lichtenberg, Department of Pathology, Harvard Medical School, Boston, MA, USA

Representatives of other organizations

United Nations Development Programme/World Bank

- Dr P. Taylor, Training Centre for Water and Sanitation, University of Zimbabwe, Harare, Zimbabwe

Secretariat

- Dr N. R. Bergquist, Secretary, Steering Committee of the Scientific Working Group on Schistosomiasis, UNDP/World Bank/WHO Special Programme for Research and Training in Tropical Diseases, WHO, Geneva, Switzerland
- Mr R. Bos, Secretary, Joint WHO/FAO/UNEP/UNCHS Panel of Experts on Environmental Management for Vector Control (PEEM), WHO, Geneva, Switzerland
- Dr J. Cook, Tropical Diseases Research Program, Edna McConnell Clark Foundation, New York, NY, USA (*Temporary Adviser*)
- Dr B. Gryseels, Department of Parasitology and Tropical Medicine, University of Leiden, Leiden, Netherlands (*Temporary Adviser*)
- Dr R. Korte, Division of Health, Population and Nutrition, German Agency for Technical Cooperation (GTZ), Eschborn, Germany (*Temporary Adviser*)
- Mr M. Laaziri, Chief, Planning Division, Ministry of Health, Rabat, Morocco (*Temporary Adviser*)
- Dr K. E. Mott, Chief, Schistosomiasis Control, Division of Control of Tropical Diseases, WHO, Geneva, Switzerland (*Secretary*)
