Executive Summary

Fourth Regional workshop to review progress towards measles-rubella and other priority VPD surveillance and outbreak preparedness and response in WHO South-East Asia Region was conducted in Dhaka, Bangladesh, 13-16 June 2022. The meeting was attended by national managers and officers of the National Immunization Programme, surveillance officers and data focal points of nine member states, together with the WHO focal points in the respective countries. The Democratic People's Republic of Korea expressed its regrets about its inability to attend the meeting and Myanmar was represented only by WHO Country office in Myanmar.

The general objective of the meeting was to strengthen Member States' capacity to conduct high quality surveillance for Measles, Rubella, and other priority VPDs for accelerated efforts towards elimination/control of all priority VPDs.

The specific objectives were to

- Review of surveillance performance in Member States for measles rubella and other priority VPDs in the context of COVID-19 pandemic
- Obtain inputs to the updated draft Regional VPD surveillance guide and finalize its contents
- Streamline the various roles of National EPI program managers, surveillance managers, and data managers to identify, investigate, report, and classify suspected cases of fever and rash
- Review and strengthen capacity for data quality improvement for measles, rubella, and other priority VPDs
- Simulation exercise on outbreak preparedness and response for measles, rubella, and other priority VPDs.

The first two days of the meeting were devoted to a review of the surveillance programme and capacity building on outbreak preparedness and response. Each country's surveillance programme was peer-reviewed by two countries and appropriate inputs and feedback were provided. Simulation exercise (SimEx) and review of preparedness checklist was done enhance capacity on outbreak preparedness and response.
