study of access to
**primary health care
in Assam**

Contents

Abbreviations	i
Executive summary	v
Chapter 1: Introduction and methodology	01
1.1 Background and rationale of the study	02
1.2 Scope of the study	02
1.3 Objectives of the study	02
1.4 Literature review	07
1.5 Conceptual framework	10
1.6 Research questions	10
1.7 Methodology	10
1.8. Sampling principle and sample size	11
1.9 Qualitative interview numbers and types	13
1.10 Limitations of the study	15
1.11 Report structure	15
Chapter-2: Understanding Assam's health system: A secondary data-based analysis	16
2.1 Introduction	16
2.2 Demographic indicators	16
2.3 Health care expenditure and utilization	20
2.4 Health infrastructure	25
2.5 Health indicators: child and maternal mortality	27
2.6 Disease burden	30
Chapter 3: Demographic profile of the survey respondents	33
3.1 Demographic profile of survey respondents of Barpeta district	33
3.2 Demographic profile of survey respondents of Golaghat district	35
3.3 Demographic profile of survey respondents of Nagaon district	37
Chapter 4: Prevalent health issues and health care seeking	40
4.1 Prevalent health issues	40
4.2 Health care seeking	43
Chapter 5: Provider choice	51
5.1 First choice provider in the event of sickness	51
5.2 Provider choice for specific provider types: private providers and traditional healers	62
5.3 Provider choice for specific kinds of health issues and health services	76
Chapter 6: The extent, nature, and composition of PHC service utilization	78
6.1 Utilization of specific services at the sampled BPHCs	78
6.2 Utilization of specific services at the sampled sub-centres	84
6.3 Who visits primary health care facilities?	88

Chapter 7: Available and expected services at primary health care facilities	93
7.1 Availability of select facilities at sample BPHCs and sub-centres	93
7.2 Availability of services in HWCs	97
7.3 Health facilities preferred by communities	102
Chapter 8: Enablers and barriers to utilization	104
8.1 Financial factors that shape utilization	105
8.2 Knowledge of services provided at primary health care facilities	110
8.3 Access and location factors	111
8.4 Service experience and service perception with respect to primary health care facilities	116
8.5 Empowerment and engagement of people and communities	120
8.6 Reinvented model of care	122
8.7 Regression analysis: How predisposing, enabling, need-based and supply-side factors shape the utilization of primary health care	123
Chapter 9: Health needs and the gaps in meeting health needs	131
9.1 Health related knowledge among the adolescent girls and role played by frontline workers	131
9.2 Maternal care	133
9.3 Mortality - extent of hospitalization/medical attention before death	137
9.4 Senior citizens - physical mobility, living arrangements and perception of health status	139
Chapter 10: Participation and engagement	141
10.1 Village Health, Nutrition and Sanitation Committee	142
