AGREEMENT¹ BETWEEN THE INTERNATIONAL CENTER FOR
AGRICULTURAL RESEARCH IN THE DRY AREAS (ICARDA)
AND THE FOOD AND AGRICULTURE ORGANIZATION OF
THE UNITED NATIONS (FAO) PLACING COLLECTIONS OF
PLANT GERMPLASM UNDER THE AUSPICES OF FAO

PREAMBLE

The International Center for Agricultural Research in the Dry Areas (ICARDA) (hereinafter referred to as the "Centre"), supported by the Consultative Group on International Agricultural Research (hereinafter referred to as "CGIAR"), and the Food and Agriculture Organization of the United Nations (hereinafter referred to as "FAO");

Considering the importance to humanity of protecting and conserving plant germplasm for future generations;

Considering the International Undertaking on Plant Genetic Resources adopted by the FAO Conference at its Twenty-second Session in 1983 (Resolution 8/83) and in particular Article 7 thereof; and the Annexes of the Undertaking adopted by the FAO Conference in 1989 and 1991;

Considering that the FAO Commission on Plant Genetic Resources (hereinafter referred to as the "Commission"), as the relevant intergovernmental body in this field, has the responsibility for monitoring of the implementation of Article 7 of the International Undertaking on Plant Genetic Resources;

Considering the Memorandum of Understanding Between the Food and Agriculture Organization of the United Nations and the International Board for Plant Genetic Resources (IBPGR) dated September 21, 1990, on the respective roles of the two organizations in establishing, maintaining and managing germplasm collections and setting standards for these collections;

Considering the strong support FAO, as one of the co-sponsors, has provided and continues to provide to the CGIAR;

Considering the importance of the plant germplasm collections held by the International Agricultural Research Centres (IARCs), supported by the CGIAR, as part of a global strategy for germplasm conservation;

Considering that the CGIAR adheres to a policy on plant genetic resources which is based on the unrestricted availability of germplasm held in their genebanks;

¹ Came into force on 26 October 1994 by signature, in accordance with article 16.

Considering that the germplasm accessions have been donated or collected on the understanding that these accessions will remain freely available and that they will be conserved and used in research on behalf of the international community, in particular the developing countries;

Considering that the Centre has expressed the wish that its designated germplasm be recognized as part of the international network of *ex situ* collections (as per the International Undertaking on Plant Genetic Resources) under the auspices of FAO;

Have agreed as follows:

ARTICLE 1

APPLICATION OF THIS AGREEMENT

This Agreement shall be construed and applied in a manner consistent with the provisions of the Convention on Biological Diversity and the International Undertaking on Plant Genetic Resources.

ARTICLE 2

BASIC UNDERTAKING

The Centre hereby places under the auspices of FAO, as part of the international network of *ex situ* collections provided for in Article 7 of the International Undertaking on Plant Genetic Resources, the collections of plant genetic resources listed in the Appendix hereto (hereinafter referred to as the "designated germplasm"), as catalogued and published by the Centre in print or machine-readable form, in accordance with the terms and conditions set forth in this Agreement. The list of designated germplasm will be updated every two years as new accessions are added to the collection.

ARTICLE 3

STATUS OF DESIGNATED GERmplasm

- (a) The Centre shall hold the designated germplasm in trust for the benefit of the international community, in particular the developing countries in accordance with the International Undertaking on Plant Genetic Resources and the terms and conditions set out in this Agreement.
- (b) The Centre shall not claim legal ownership over the designated germplasm, nor shall it seek any intellectual property rights over that germplasm or related information.

ARTICLE 4

PREMISES

- (a) The premises in which the designated germplasm is conserved shall remain in the charge of the Centre.
- (b) FAO shall have a right of access to the premises at any time and the right to inspect all activities performed therein directly related to the conservation and exchange of the designated germplasm.

ARTICLE 5

MANAGEMENT AND ADMINISTRATION

- (a) The Centre undertakes to manage and administer the designated germplasm in accordance with internationally accepted standards, including, with respect to the storage, exchange and distribution of seeds, the international Genebank Standards endorsed by the Commission, as soon as possible applying the "preferred standards" where these are specified, and ensuring that all the designated germplasm is duplicated in order to ensure its safety.
- (b) FAO may recommend action, if it considers such action to be desirable, in order to ensure the proper conservation of the designated germplasm.
- (c) If the orderly maintenance of the germplasm collection of the Centre is impeded or threatened by whatever event, including *force majeure*, FAO shall assist in the evacuation and/or transfer of the collections, to the extent possible. The cost of such an operation will be covered by the Centre concerned.

ARTICLE 6

POLICIES

The Centre recognizes the intergovernmental authority of the Commission in setting policies for the International Network referred to in Article 7 of the International Undertaking and undertakes to consult with FAO and its Commission on proposed policy changes related to the conservation of, or accessibility to, the designated germplasm, subject, always, to the provisions of Article 9 hereinafter. The Centre shall give full consideration to any policy changes proposed by the Commission.

ARTICLE 7

STAFF

- (a) Staff responsible to manage and administer the designated germplasm shall be employed and remunerated by the Centre.
